I. Abstract

The Economic Development Administration (EDA) leads the Federal economic development agenda by promoting innovation and competitiveness, preparing American regions for growth and success in the worldwide economy. Guided by the basic principle that sustainable economic development should be driven locally, EDA works directly with communities and regions to help them build the capacity for economic development based on local business conditions and needs. The Public Works and Economic Development Act of 1965 (PWEDA) (42 U.S.C. 3121 *et seq.*) is EDA’s organic authority and is the primary legal authority under which EDA awards financial assistance. Under PWEDA, EDA provides financial assistance to both rural and urban distressed communities by fostering entrepreneurship, innovation, and productivity through investments in infrastructure development, workforce development, capacity building, and business development to attract private capital investments and new and better jobs to regions experiencing economic distress. Further information on EDA programs and financial assistance opportunities can be found at www.eda.gov.

To effectively administer and monitor its economic development assistance programs, EDA collects certain information from applications for, and recipients of, EDA investment assistance. The purpose of this notice is to seek comments from the public and other Federal agencies on a request for a new information collection by an EDA grantee. This grantee will collect information about the economic development needs, planning, and priorities of Indigenous communities. Findings from the survey will inform EDA’s work with Indigenous communities and will support other agencies, organizations, and communities in better planning, funding, and implementing economic development activities.

To that end, the grantee will conduct an electronic data collection survey. A subset of the recipients (20) will also be engaged in phone interviews to better understand the experiences and decision-making processes when evaluating opportunities for economic development funding. EDA is particularly interested in public comment on how the proposed data collection will support the assessment of program effectiveness, or if alternative information should be considered.
