The Commission's Rules of Practice and Procedure require all intervenors filing documents with the Commission to serve a copy of that document on each person whose name appears on the official service list for the project. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

1. *Description of Request:* Green Mountain Power Corporation (licensee) requests Commission approval to replace the existing Unit 3 turbine runner with a new turbine runner. The upgrades would decrease the project's authorized installed capacity from 2,250 kilowatts (kW) to 1,800 kW and increase the maximum hydraulic capacity from 945 cubic feet per second (cfs) to 1,052 cfs. The increased efficiency of the turbine unit would result in an increase in annual energy generation. The licensee does not propose any other structural modifications to the powerhouse or any other project structures. During construction, Units 1 and 2 would remain operational, and any excess river flow would pass over the project dam into the bypass reach. In addition, the licensee states all construction activities associated with the proposed amendment would occur within the existing powerhouse and would be isolated from the river. Access to the powerhouse area for delivery of the Unit 3 turbine runner and construction vehicles would be via the existing access road, and would not require any ground disturbance. The licensee does not propose any changes to the licensed project operations during or after turbine runner replacement.

In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding. Any comments, protests, or motions to intervene must be received on or before the specified comment date for the particular application.
