[Project No. 6066–041]

McCallum Enterprises I, Limited Partnership and Shelton Canal Company; Notice Rejecting Application, Waiving Regulations, and Soliciting Applications

On March 1, 2024, McCallum Enterprises I, Limited Partnership and Shelton Canal Company (McCallum and Shelton), co-licensees for the Derby Dam Hydroelectric Project No. 6066 (project), filed an application for a new license for the project pursuant to section 15(c)(1) of the Federal Power Act (FPA). The license application was untimely filed and is hereby rejected.¹

The project is located on the Housatonic River in Fairfield and New Haven Counties, Connecticut. The project consists of: (a) a 23.7-foot-high, 675-foot-long dam made of concrete capped cut stone with flashboards of varying heights, ranging from 1.8-foot-high to 2.2-foot-high, and a crest elevation of 25.2 feet National Geodetic Vertical Datum of 1988 (NGVD 88); (b)

a 400-foot-long earth dike with a maximum height of 10 feet, located at the east abutment and oriented in a northwest-southwest direction; (c) a reservoir (Lake Housatonic) with a normal maximum water surface elevation of 25.2 feet NGVD 88 and a usable storage capacity of 500 acre-feet; (d) a gatehouse (Derby gatehouse) and 2,135 foot-long, 40-foot-wide canal paralleling the east bank of the river; (e) a gatehouse (Shelton gatehouse) and 130-foot-long, 94-foot-wide headrace channel extending downstream from the dam; (f) a navigation lock located at the west abutment, which constitutes the first 70 feet of the Shelton canal; (g) a powerhouse (Shelton powerhouse) at the west abutment, in the existing Shelton canal and lock structure, and located approximately 130 feet downstream of the Shelton gatehouse, containing two horizontal A–C tube Kaplan turbines with two direct drive generators with a total rated capacity of 7.8 megawatts and a rated flow of 4,600 cubic feet per second; (h) a 775-foot-long, 13.8 kilovolt underwater transmission line tying into the existing United Illuminating Company system; and (i) appurtenant facilities.

As a result of the rejection of McCallum and Shelton's application and pursuant to section 16.25 of the Commission's regulations, the Commission is soliciting license applications from potential applicants. This solicitation is necessary because the deadline for filing an application for a new license and any competing license applications, pursuant to section 16.9 of the Commission's regulations, was February 29, 2024, and no other license applications for this project were filed. With this notice, we are waiving those parts of section 16.24(a) and 16.25(a) which bar an existing licensee that missed the two-year application filing deadline from filing another application. Further, because McCallum and Shelton completed the consultation requirements pursuant to Part 4 of the Commission's regulations, we are waiving the consultation requirements in section 16.8 for the existing licensees. Consequently, McCallum and Shelton will be allowed to refile a license application and compete for the license, and the incumbent preference established by the FPA section 15(a)(2) will apply.²

The licensees are required to make available certain information described in section 16.7 of the regulations. For

¹ Eveready Machinery Company, Inc. was issued a major license for the project on March 25, 1986, for a term of 40 years, effective the first day of the month in which the order was issued. See *Eveready Machinery Company, Inc.*, 34 FERC ¶ 62,578 (1986). Therefore, the license would expire on February 28, 2026, and the statutory deadline for filing a new license application was February 29, 2024. See FPA § 15(c)(1), 16 U.S.C. 808(c)(1). The Commission received the application via the internet at 12:09 a.m. Eastern Time on March 1, 2024.

Pyrites Hydro, LLC; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission) regulations, 18 CFR part 380, the Office of Energy Projects has reviewed the application for a new license to continue to operate and maintain the Pyrites Hydroelectric Project No. 6115 (project). The project is located on the Grass River in St. Lawrence County, New York. Commission staff has prepared an Environmental Assessment (EA) for the project.

The EA contains the staff's analysis of the potential environmental impacts of the project and concludes that licensing the project, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The Commission provides all interested persons with an opportunity to view and/or print the EA via the internet through the Commission's Home Page (<http://www.ferc.gov/>), using the "eLibrary" link. Enter the docket number, excluding the last three digits in the docket number field, to access the
