[Docket No. RM98-1-000]

Records Governing Off-the-Record Communications; Public Notice

This constitutes notice, in accordance with 18 CFR 385.2201(b), of the receipt of prohibited and exempt off-the-record communications.

Order No. 607 (64 FR 51222, September 22, 1999) requires Commission decisional employees, who make or receive a prohibited or exempt off-the-record communication relevant to the merits of a contested proceeding, to deliver to the Secretary of the Commission, a copy of the communication, if written, or a summary of the substance of any oral communication.

Prohibited communications are included in a public, non-decisional file associated with, but not a part of, the decisional record of the proceeding. Unless the Commission determines that the prohibited communication and any responses thereto should become a part of the decisional record, the prohibited off-the-record communication will not be considered by the Commission in reaching its decision. Parties to a proceeding may seek the opportunity to respond to any facts or contentions made in a prohibited off-the-record communication and may request that the Commission place the prohibited communication and responses thereto in the decisional record. The Commission will grant such a request

only when it determines that fairness so requires. Any person identified below as having made a prohibited off-the-record communication shall serve the document on all parties listed on the official service list for the applicable proceeding in accordance with Rule 2010, 18 CFR 385.2010.

Exempt off-the-record communications are included in the decisional record of the proceeding, unless the communication was with a cooperating agency as described by 40 CFR 1501.6, made under 18 CFR 385.2201(e)(1)(v).

The following is a list of off-the-record communications recently received by the Secretary of the Commission. Further, if an intervenor files comments or documents with the Commission relating to the merits of an issue that may affect the responsibilities of a particular resource agency, they must also serve a copy of the document on that resource agency.

1. *Description of Request:* Green Mountain Power Corporation (licensee) requests Commission approval to replace the existing Unit 3 turbine runner with a new turbine runner. The upgrades would decrease the project's authorized installed capacity from 2,250 kilowatts (kW) to 1,800 kW and increase the maximum hydraulic capacity from 945 cubic feet per second (cfs) to 1,052 cfs. The increased efficiency of the turbine unit would result in an increase in annual energy generation. The licensee does not propose any other structural modifications to the powerhouse or any other project structures. During construction, Units 1 and 2 would remain operational, and any excess river flow would pass over the project dam into the bypass reach. In addition, the licensee states all construction activities associated with the proposed amendment would occur within the existing powerhouse and would be isolated from the river. Access to the powerhouse area for delivery of the Unit 3 turbine runner and construction vehicles would be via the existing access road, and would not require any ground disturbance. The licensee does not propose any changes to the licensed project operations during or after turbine runner replacement.

In determining the appropriate action to take, the Commission will consider all protests or other comments filed, but only those who file a motion to intervene in accordance with the Commission's Rules may become a party to the proceeding.
