

While it no longer does so, in the past, the Museum applied potentially hazardous pesticides to items in the collections. Museum records do not list specific objects treated or which of several chemicals used were applied to a particular item. Therefore, those handling this material should follow the advice of industrial hygienists or medical personnel with specialized training in occupational health or with potentially hazardous substances.

Abstract of Information Available

Based on the information available, associated funerary objects have been identified from the Progressive Rod & Gun Club Site (47-GL-0186), Green Lake County, WI. John (Jack) Steinbring removed individuals and the associated funerary objects during a surface survey in 1954. After removal, John Steinbring kept them in his possession and did not report them to Wisconsin Historical Society. In the 1960s, John Steinbring began working at the University of Winnipeg in Canada and brought the individuals with him. In the early 1990s, John Steinbring retired from the University of Winnipeg and shipped the individuals and objects back to Wisconsin when he returned. In 1994, he donated the individuals and objects to UWO. In 2022, employees at UWO identified the presence of human remains while inventorying the site, and subsequently published a Notice of Inventory Completion describing the individuals and associated funerary objects in October 2023. In November 2023, additional associated funerary objects were identified. The 24 associated funerary objects are one medium canid left femur bone; one medium canid left ulna bone; one medium canid left humerus bone; one medium canid right ulna bone; one medium canid right humerus bone; six diagnostic grit tempered ceramic body sherds; seven undiagnostic grit tempered ceramic body sherds; one lot of diagnostic grit tempered rim sherds; three undiagnostic shell tempered ceramic body sherds; one lot of grit tempered ceramic body fragments; and one unidentifiable copper fragment.
