## DEPARTMENT OF ENERGY

### Federal Energy Regulatory Commission

[Project No. 1888-043]

#### York Haven Power Company, LLC; Notice of Availability of Environmental Assessment

In accordance with the National Environmental Policy Act of 1969 and the Federal Energy Regulatory Commission's (Commission or FERC) regulations, 18 CFR part 380, Commission staff reviewed York Haven Power Company, LLC's (licensee) application for a non-capacity amendment of the license for the York Haven Hydroelectric Project No. 1888 and have prepared an Environmental Assessment (EA). The licensee proposes to amend its project license to reflect a change in the design of the nature-like fishway required by Article 401 of the project license, Pennsylvania

Department of Environmental Protection's Water Quality Certificate, and U.S. Fish and Wildlife Service's fishway prescription. The proposed design change would result in the construction of an inland nature-like fishway rather than the in-river fishway currently required by the license. The York Haven project is located in York, Dauphin, and Lancaster counties in south central Pennsylvania. The project is not located on federal lands.

The EA contains Commission staff's analysis of the potential environmental effects of the proposed change in nature-like fishway design, alternatives to the proposed action, and concludes that the proposed amendment, with appropriate environmental protective measures, would not constitute a major federal action that would significantly affect the quality of the human environment.

The EA may be viewed on the Commission's website at <http://www.ferc.gov> using the "elibrary" link. Enter the docket number (P-1888) in the docket number field to access the document.
