Abstract: The New Source Performance Standards (NSPS) for Asphalt Processing and Roofing Manufacture (40 CFR part 60, subpart UU) were promulgated on August 6, 1982, and most-recently amended on February 27, 2014. These regulations apply to both existing and new saturators and mineral handling and asphalt storage facilities at asphalt roofing manufacturing plants and to asphalt storage tanks and blowing stills at asphalt processing plants, petroleum refineries, and asphalt roofing plants. New facilities include those that commenced construction, modification, or reconstruction after the date of proposal. This information is being collected to assure compliance with 40 CFR part 60, subpart UU.

Form Numbers: None.

Respondents/affected entities: Asphalt processing and asphalt roofing manufacture facilities.

Respondent's obligation to respond: Mandatory (40 CFR 60, Subpart UU).

Estimated number of respondents: 144 (total).

Frequency of response: Initially and semiannually.

Total estimated burden: 34,100 hours (per year). Burden is defined at 5 CFR 1320.3(b).

Total estimated cost: \$11,700,000 (per year), which includes \$7,430,000 in annualized capital/startup and/or operation & maintenance costs.

Changes in the estimates: There is no change in burden from the most recently approved ICR as currently identified in the OMB Inventory of Approved Burdens. This is due to two considerations: (1) the regulations have not changed over the past three years and are not anticipated to change over the next three years; and (2) the growth rate for this industry is very low or non-existent, so there is no significant change in the overall burden. There is a slight increase in costs, which is wholly due to the use of updated labor rates. There is an increase in capital/startup and/or operation & maintenance costs due to an adjustment to increase from 2008 to 2022 dollars using the CEPCI Equipment Cost Index.

Courtney Kerwin,

Director, Regulatory Support Division.
