SUPPLEMENTARY INFORMATION:

I. Abstract

This request is to initiate a new information collection using a generic clearance to allow the Marine

Recreational Information Program (MRIP) to develop, test, and improve its surveys and methodologies. Marine recreational anglers are surveyed to collect catch and effort data, fish biology data, and angler socioeconomic characteristics. These data are required to carry out provisions of the Magnuson-Stevens Fishery Conservation and Management Act (16 U.S.C. 1801 *et seq.*), as amended, regarding conservation and management of fishery resources.

Marine recreational fishing catch and effort data are collected through a combination of mail surveys, telephone surveys and on-site intercept surveys with recreational anglers. The procedures utilized to this effect will include but are not limited to experiments with levels of incentives for various types of survey operations, focus groups, cognitive laboratory activities, pilot testing, exploratory interviews, experiments with questionnaire design, and usability testing of electronic data collection instruments.

II. Method of Collection

Information will be collected through self-administered mail surveys, face-to-face interviews, focus groups, telephone surveys and online web surveys.
