

withdrawn from sale for reasons of safety or effectiveness.

Accordingly, the Agency will continue to list VISTARIL (hydroxyzine pamoate) Oral Suspension, 25 mg/5 mL, in the “Discontinued Drug Product List” section of the Orange Book. The “Discontinued Drug Product List” delineates, among other items, drug products that have been discontinued from marketing for reasons other than safety or effectiveness. ANDAs that refer to VISTARIL (hydroxyzine pamoate) Oral Suspension, 25 mg/5 mL, may be approved by the Agency as long as they meet all other legal and regulatory requirements for the approval of ANDAs. If FDA determines that labeling for this drug product should be revised to meet current standards, the Agency will advise ANDA applicants to submit such labeling.

Dated: April 8, 2024.

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Food and Drug Administration

[Docket No. FDA-2023-P-4587]

#### Determination That KEMSTRO (Baclofen) Orally Disintegrating Tablets, 10 Milligrams and 20 Milligrams, Were Not Withdrawn From Sale for Reasons of Safety or Effectiveness

**AGENCY:** Food and Drug Administration, HHS.

**ACTION:** Notice.

**SUMMARY:** The Food and Drug Administration (FDA, Agency, or we) has determined that KEMSTRO (baclofen) orally disintegrating tablets, 10 milligrams (mg) and 20 mg, were not withdrawn from sale for reasons of safety or effectiveness. This determination will allow FDA to approve abbreviated new drug applications (ANDAs) for baclofen orally disintegrating tablets, 10 mg and 20 mg, if all other legal and regulatory requirements are met.

**FOR FURTHER INFORMATION CONTACT:** Alexander Poonai, Center for Drug Evaluation and Research, Food and Drug Administration, 10903 New

Hampshire Ave., Bldg. 51, Rm. 6213, Silver Spring, MD 20993-0002, 301-796-9120, *Alexander.Poonai@fda.hhs.gov*.

**SUPPLEMENTARY INFORMATION:** Section 505(j) of the Federal Food, Drug, and Cosmetic Act (FD&C Act) (21 U.S.C. 355(j)) allows the submission of an ANDA to market a generic version of a previously approved drug product. To obtain approval, the ANDA applicant must show, among other things, that the generic drug product: (1) has the same active ingredient(s), dosage form, route of administration, strength, conditions of use, and (with certain exceptions) labeling as the listed drug, which is a version of the drug that was previously approved, and (2) is bioequivalent to the listed drug. ANDA applicants do not have to repeat the extensive clinical testing otherwise necessary to gain approval of a new drug application (NDA).

Section 505(j)(7) of the FD&C Act requires FDA to publish a list of all approved drugs. FDA publishes this list as part of the “Approved Drug Products With Therapeutic Equivalence Evaluations,” which is known generally as the “Orange Book.” Under FDA regulations, drugs are removed from the list if the Agency withdraws or suspends approval of the drug’s NDA or ANDA for reasons of safety or effectiveness or if FDA determines that the listed drug was withdrawn from sale for reasons of safety or effectiveness (21 CFR 314.162).

A person may petition the Agency to determine, or the Agency may determine on its own initiative, whether a listed drug was withdrawn from sale for reasons of safety or effectiveness. This determination may be made at any time after the drug has been withdrawn from sale, but must be made prior to approving an ANDA that refers to the listed drug (§ 314.161 (21 CFR 314.161)). FDA may not approve an ANDA that does not refer to a listed drug.

KEMSTRO (baclofen) orally disintegrating tablets, 10 mg and 20 mg, are the subject of NDA 021589, held by UCB, Inc., and initially approved on October 30, 2003. KEMSTRO is indicated for the alleviation of signs and symptoms of spasticity resulting from multiple sclerosis, particularly for the relief of flexor spasms and concomitant pain, clonus, and muscular rigidity.

KEMSTRO (baclofen) orally disintegrating tablets, 10 mg and 20 mg,

are currently listed in the “Discontinued Drug Product List” section of the Orange Book.

Pharmobedient Consulting, LLC, submitted a citizen petition dated October 16, 2023 (Docket No. FDA-2023-P-4587), under 21 CFR 10.30, requesting that the Agency determine whether KEMSTRO (baclofen) orally disintegrating tablets, 10 mg and 20 mg, were withdrawn from sale for reasons of safety or effectiveness.

After considering the citizen petition and reviewing Agency records and based on the information we have at this time, FDA has determined under § 314.161 that KEMSTRO (baclofen) orally disintegrating tablets, 10 mg and 20 mg, were not withdrawn for reasons of safety or effectiveness. The petitioner has identified no data or other information suggesting that KEMSTRO (baclofen) orally disintegrating tablets, 10 mg and 20 mg, were withdrawn for reasons of safety or effectiveness. We have carefully reviewed our files for records concerning the withdrawal of KEMSTRO (baclofen) orally disintegrating tablets, 10 mg and 20 mg, from sale. We have also independently evaluated relevant literature and data for possible postmarketing adverse events. We have found no information that would indicate that these drug products were withdrawn from sale for reasons of safety or effectiveness.

Accordingly, the Agency will continue to list KEMSTRO (baclofen) orally disintegrating tablets, 10 mg and 20 mg, in the “Discontinued Drug Product List” section of the Orange Book. The “Discontinued Drug Product List” delineates, among other items, drug products that have been discontinued from marketing for reasons other than safety or effectiveness. ANDAs that refer to KEMSTRO (baclofen) orally disintegrating tablets, 10 mg and 20 mg, may be approved by the Agency so long as they meet all other legal and regulatory requirements for the approval of ANDAs. If FDA determines that labeling for these drug products should be revised to meet current standards, the Agency will advise ANDA applicants to submit such labeling.

Dated: April 8, 2024.
