SUPPLEMENTARY INFORMATION: The Housing Counseling system (HCS) is a system Housing uses to manage HUDS

Housing Counseling program. HCS is the sole web-based application to input, review, report and analyze data on HUD's Housing Counseling program. HCS is a real-time automated data management system to manage the housing counseling program by maintaining the HUD-Approved housing counseling agency list, providing their profile information to program users, processing their grant applications, sharing data with other SF Housing programs, and collecting agencies HUD-9902 reports. Based on a recent review, it was determined that the HCS system no longer collects Personal Identifiable Information (PII). The existing PII will remain in a database that is only accessible through a database extraction tool that recalls the data located in the database. This is a tool only used by the contractor assigned to manage the database. It was determined that previously collected PII data is not Mission Critical Data and therefore is no longer required. Records are no longer maintained by the Office of Housing Counseling and have run the record retention period. The records were wiped from the system. The electronic records were destroyed in accordance with schedule 20 of the National Archives and Records Administration General Records Schedule.
