Needs and Uses: The information collection requirements contained in 47 CFR 73.623 requires applicants to submit a technical showing to establish that their proposed facilities will not result in additional interference to TV broadcast operations. The Commission permits broadcasters to agree to proposed TV facilities that do not conform to the allotted parameters, even though they might be affected by potential new interference. The Commission will consider granting applications on the basis of interference agreements if it finds that such grants will serve the public interest. These agreements must be signed by all parties to the agreement. In addition, the Commission needs the following information to enable such public interest determinations: A list of parties predicted to receive additional interference from the proposed facility; a showing as to why a grant based on the agreements would serve the public interest; and technical studies depicting the additional interference. The technical showings and interference agreements will be used by FCC staff to determine if the public interest would be served by the grant of the application and to ensure that the proposed facilities will not result in additional interference.

Title: Carriage of Digital Television Broadcast Signals: Amendment to Part 76 of the Commission's Rules.

Form No.: N/A.

Type of Review: Extension of a currently approved collection.

Respondents: Business or other for-profit entities.

Number of Respondents and Responses: 11 respondents and 11 responses.

Estimated Time per Response: 0.25 hours (15 minutes).

Frequency of Response: Third party disclosure requirement and recordkeeping requirement.

Total Annual Burden: 3 hours.

Obligation to Respond: Required in order to monitor regulatory compliance. The statutory authority for this information collection is contained in sections 4, 303, 614, and 615 of the Communications Act of 1934, as amended.

Needs and Uses: The information collection imposes a notification requirement on certain small cable systems that become ineligible for exemption from the requirement to carry high definition broadcast signals in HD (adopted in FCC 15–65). In particular, the information collection requires that, beginning December 12, 2016, at the time a small cable system utilizing the HD carriage exemption offers any programming in HD, the system must give notice that it is offering HD programming to all broadcast stations in its market that are carried on its system. Cable operators also must keep records of such notification. This information collection requirement allows affected broadcast stations to monitor compliance with the requirement that cable operators transmit high definition broadcast signals in HD.
