II. Background

Under the provisions of the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC recently submitted a request for renewal of an existing collection of information to OMB for review entitled, “Domestic Licensing of Special Nuclear Material.” The NRC hereby informs potential respondents that an agency may not conduct or sponsor, and that a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

The NRC published a **Federal Register** notice with a 60-day comment period on this information collection on November 21, 2023, 88 FR 81110.

1. *The title of the information collection:* Domestic Licensing of Special Nuclear Material.
2. *OMB approval number:* 3150–0009.
3. *Type of submission:* Extension.
4. *The form number, if applicable:* Not applicable.

5. *How often the collection is required or requested:* Required reports are collected and evaluated on a continuing basis as events occur. Applications for new licenses and amendments may be submitted at any time. Generally, renewal applications are submitted every 10 years, although the Commission has allowed longer periods for major fuel cycle facilities; updates of the Integrated Safety Analysis Summary are submitted annually.

6. *Who will be required or asked to respond:* Applicants for and holders of specific and general licenses to receive title to, own, acquire, deliver, receive, possess, use, or initially transfer special nuclear material.

7. *The estimated number of annual responses:* 1,036 (494 reporting responses + 240 recordkeepers + 302 third-part disclosure responses).

8. *The estimated number of annual respondents:* 240.

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 58,814 (53,145 reporting + 5,635 recordkeeping + 34 third-party disclosure).

10. *Abstract:* Part 70 of title 10 of the *Code of Federal Regulations*, “Domestic Licensing of Special Nuclear Material,” establishes requirements for licensees to own, acquire, receive, possess, use, and transfer special nuclear material. The information in the applications, reports, and records are used by the NRC to make licensing and or regulatory determinations concerning the use of special nuclear material.

The NRC does not routinely edit comment submissions to remove identifying or contact information.

II. Discussion

NUREG–1022, Revision 3, “Event Reporting Guidelines: 10 CFR 50.72 and 50.73,” issued January 2013 (ADAMS Accession No. ML13032A220), contains guidelines that the staff of the NRC considers acceptable for use in meeting the reporting requirements in section 50.72 of title 10 of the *Code of Federal Regulations* (10 CFR), “Immediate notification requirements for operating nuclear power reactors,” and 10 CFR 50.73, “Licensee event report system.” In August 2018, the Nuclear Energy Institute submitted a petition for rulemaking to amend 10 CFR 50.72 (ADAMS Accession No. ML18247A204).

In 2021, the Commission directed the NRC staff to pursue the rulemaking (ADAMS Accession No. ML21209A953). As part of this rulemaking effort, the NRC determined that clarifications to the guidance in section 3.2.4, “Degraded or Unanalyzed Condition,” of NUREG 1022, Revision 3, could address part of the concerns identified in the petition.

In developing Supplement 2 to NUREG–1022, Revision 3, the NRC evaluated data on submitted and retracted events and held a public meeting on August 9, 2023 (ADAMS Accession No. ML23270B927), to discuss section 3.2.4 of NUREG–1022 with stakeholders. Supplement 2 would provide updated guidance for nuclear power reactor licensees and could be used for evaluating and reporting degraded or unanalyzed conditions as described in 10 CFR 50.72(b)(3)(ii) and 10 CFR 50.73(a)(2)(ii). The specific guidance included in Supplement 2, once final, will supersede the guidance found in section 3.2.4 of NUREG–1022, Revision 3.

III. Backfitting, Forward Fitting, and Issue Finality

Issuance of NUREG–1022, Revision 3, Supplement 2, if finalized, would not constitute backfitting as defined in 10 CFR 50.109, “Backfitting,” and as described in NRC Management Directive (MD) 8.4, “Management of Backfitting, Forward Fitting, Issue Finality, and Information Requests”; affect issue finality of any approval issued under 10 CFR part 52, “Licenses, Certificates, and Approvals for Nuclear Power Plants”; or constitute forward fitting as defined in MD 8.4, because licensees would not be required to comply with the guidance in Supplement 2.

IV. Public Comments

This document requests comments from interested members of the public by June 17, 2024. After evaluating the comments received, the staff will either reconsider the proposed change or announce the availability of the change in a subsequent document published in the **Federal Register** (perhaps with some changes as a result of public comments).
