

alternatives for conducting and funding fisheries and ecosystem research activities as the primary Federal action. Additionally, in the Draft SPEA, NMFS evaluates a related action—also called a “connected action” under 40 CFR 1508.25 of the Council on Environmental Quality’s regulations for implementing the procedural provisions of NEPA (42 U.S.C. 4321 *et seq.*)—which is the proposed promulgation of regulations and authorization of the take of marine mammal incidental to the fisheries research under the Marine Mammal Protection Act (MMPA). Additionally, because the proposed research activities occur in areas inhabited by species of marine mammals, birds, sea turtles and fish listed under the Endangered Species Act (ESA) as threatened or endangered, this Draft SPEA evaluates activities that could result in unintentional takes of ESA-listed marine species.

The following two alternatives are currently evaluated in the Draft SPEA:

- Alternative 1—Continue current fisheries and ecosystem research (Status Quo/no action) as described in the 2019 AFSC PEA.
- Alternative 2—Conduct current research with some modifications as well as new research activities that are planned for the future (*i.e.*, 2024–2029). New future research proposed under Alternative 2 was not previously analyzed in the 2019 PEA.

The alternatives include a program of fisheries and ecosystem research projects conducted or funded by the AFSC as the primary Federal action. Because this primary action is connected to a secondary Federal action, to consider authorizing incidental take of marine mammals under the MMPA, NMFS must identify as part of this evaluation “(t)he means of effecting the least practicable adverse impact on the species or stock and its habitat.” (section 101(a)(5)(A) of the MMPA [16 U.S.C. 1361 *et seq.*]) NMFS must therefore identify and evaluate a reasonable range of mitigation measures to minimize impacts to protected species that occur in AFSC research areas. These mitigation measures are considered as part of the identified alternatives in order to evaluate their effectiveness to minimize potential adverse environmental impacts. The two action alternatives also include mitigation measures intended to minimize potentially adverse interaction with other protected species that occur within the action area. Protected species include all marine mammals, which are covered under the MMPA, all species listed under the

ESA, and bird species protected under the Migratory Bird Treaty Act.

Potential direct and indirect effects on the environment are evaluated under each alternative in the Draft SPEA. The environmental effects on the following resources are considered: physical environment, special resource areas, fish, marine mammals, birds, sea turtles, invertebrates, and the social and economic environment. Cumulative effects of external actions and the contribution of fisheries research activities to the overall cumulative impact on the aforementioned resources is also evaluated in the Draft SPEA for the geographic regions in which AFSC surveys are conducted.

NMFS requests comments on the Draft SPEA for Fisheries Research Conducted and Funded by the National Marine Fisheries Service, Alaska Fisheries Science Center. Please include, with your comments, any supporting data or literature citations that may be informative in substantiating your comment.

SUPPLEMENTARY INFORMATION: Atlantic HMS fisheries (tunas, billfish, swordfish, and sharks) are managed under the 2006 Consolidated Atlantic HMS Fishery Management Plan (FMP) and its amendments pursuant to the authority of the Magnuson-Stevens Fishery Conservation and Management Act (Magnuson-Stevens Act; 16 U.S.C. 1801 *et seq.*) and consistent with the Atlantic Tunas Convention Act (16 U.S.C. 971 *et seq.*). HMS implementing regulations are at 50 CFR part 635.

The Magnuson-Stevens Act requires the establishment of APs and requires NMFS to consult with and consider the comments and views of AP members during the preparation and implementation of FMPs or FMP amendments (16 U.S.C. 1854(g)(1)(A)–(B)). NMFS meets with the HMS AP approximately twice each year to consider potential alternatives for the conservation and management of Atlantic tunas, swordfish, billfish, and shark fisheries, consistent with the Magnuson-Stevens Act.

Some of the discussion topics are:

- Outcomes of the 2023 International Commission for the Conservation of Atlantic Tunas Annual Meeting;
