II	Technical Amendments.		

SUPPLEMENTARY INFORMATION:

Summaries for each FAR rule follow. For the actual revisions and/or amendments made by these FAR rules, refer to the specific item numbers and subjects set forth in the documents following these item summaries. FAC 2024–05 amends the FAR as follows:

Item I—Sustainable Procurement (FAR Case 2022–006)

This final rule amends the Federal Acquisition Regulation (FAR) to restructure and update FAR part 23 to focus on current environmental and sustainability matters and to implement a requirement for agencies to procure sustainable products and services to the maximum extent practicable. As a result of this rule, content related to sustainable products and services, energy savings performance contracts, hazardous and radioactive materials, pollution prevention at Federal facilities, and greenhouse gases are consolidated into single subparts at FAR subpart 23.1, 23.2, 23.3, 23.4, and 23.5,

respectively. Non-environmental matters, to include requirements for a drug-free workplace and encouraging contractors to ban texting while driving, are moved to FAR part 26. The existing statutory and other Environmental Protection Agency (EPA) purchasing program requirements (previously implemented in FAR subparts 23.2, 23.4, 23.7, and 23.8) are consolidated in FAR subpart 23.1. This rule will require agencies to specify in the statement of work, or elsewhere in the contract, the sustainable products and services, including the purchasing programs and types of products or services, that are applicable to the acquisition. A new omnibus contract clause at FAR 52.223–23, Sustainable Products and Services, will require contractors to ensure the sustainable products and services identified in the contract are delivered, incorporated, or furnished under the contract. The rule also updates agency requirements for construction and architect-engineer contracts at FAR 36.104(b)(1) to align with the Council on

Environmental Quality’s Guiding Principles for Federal Leadership in High-Performance and Sustainable Buildings. The final rule may have a significant economic impact on a substantial number of small entities who compete on Federal contracts. These entities will need to ensure that they are offering and delivering sustainable products and services, as specified in agency solicitations and contracts.

Item II—Technical Amendments

An administrative change is made at FAR 1.106, 1.401, 4.1702, 5.704, 8.402, 8.404, 8.405–1, 8.405–2, 8.405–3, 8.405–6, 16.505, 19.305, 19.507, 28.203–1, 31.205–40, 39.000, and 52.212–3.
