

(denial of the exemption request) would require Susquehanna to keep the spent fuel in the spent fuel pool until older design canisters can be fabricated and delivered to site. Not allowing the planned future loading campaign could affect Susquehanna's ability to manage pool capacity, reactor fuel offloading, and refueling. It could also impact Susquehanna's availability to manage personnel resources and coordinate personnel outages at SSES and across the industry. The NRC has determined that these potential impacts of the no-action alternative could be avoided by proceeding with the proposed exemption, especially given that the staff has concluded in NRC's Safety Determination Memorandum, issued with respect to the enforcement action

against Holtec regarding these violations, that fuel can be stored safely in the MPC-89-CBS.

Agencies Consulted

The NRC provided the Pennsylvania Department of Environmental Protection (PDEP) a copy of this draft EA for review by an email dated April 10, 2024. On April 12, 2024, the PDEP provided its concurrence by email.

III. Finding of No Significant Impact

The environmental impacts of the proposed action have been reviewed in accordance with the requirements in 10 CFR part 51, which implement NEPA. Based upon the foregoing environmental assessment, the NRC finds that the proposed action of granting the exemption from the regulations in 10

CFR 72.212(a)(2), 72.212(b)(3), 72.212(b)(5)(i), 72.212(b)(11) and 72.214, which require the licensee to comply with the terms, conditions, and specifications of the CoC, would not significantly impact the quality of the human environment. The exemption in this case would be limited to specific future loading of six canisters with the CBS variant design beginning in August 2024. Accordingly, the NRC has determined that a FONSI is appropriate, and an environmental impact statement is not warranted.
