SUPPLEMENTARY INFORMATION:

Title: FERC–512, Preliminary Permit. *OMB Control No.:* 1902–0073.

Type of Request: Three-year approval of the FERC–512 information collection requirements, with no changes to the current reporting requirements.

Abstract: Sections 4(f) and 5(b) of the Federal Power Act authorize the Commission to issue a preliminary permit for a term of up to four years, extend a permit term once for not more than four additional years, and issue an additional permit after the end of an extension period.¹ The FERC–512 is an application for a preliminary permit or to extend a preliminary permit term. The purpose of obtaining a preliminary permit is to maintain priority status for

an application for a license while the applicant conducts site examinations and surveys to inform a decision on whether to pursue a license for the project, and if so, prepare a license application. A preliminary permit neither authorizes construction of any facilities, nor provides the use of eminent domain to acquire lands for the project. No application for a preliminary permit or license submitted by another party can be accepted during the permit term.

Commission staff review preliminary permit applications to assess the scope of the proposed project, the technology to be used, and jurisdictional aspects of the project. The staff assessment includes a review of the proposed hydro development for conflicts with other current permits or licensed projects, and issuance of public notice of the permit application to solicit public and agency comments. An application for a preliminary permit includes the applicant’s name and contact information, a description of the proposed project, the requested term of the permit, names and addresses of the affected political jurisdictions, a verification of the application’s facts, and three exhibits, per 18 CFR 4.81.

Type of Respondents: Business or other for-profit and not-for-profit entities.

Estimate of Annual Burden² and Cost:³ The Commission estimates as shown below in the table:

FERC–512: (PRELIMINARY PERMIT)

	Number of respondents	Annual number of responses per respondent	Total number of responses	Average burden hours & cost per response	Total annual burden hours & total annual cost	Average annual cost per respondent
	(1)	(2)	(1) * (2) = (3)	(4)	(3) * (4) = (5)	(5) ÷ (1)
Annual Reporting and Recordkeeping	65	1	65	24 hrs.; \$2,400	1,560 hrs.; \$156,000	\$2,400
TOTAL FERC–512	65	1	65	24 hrs.; \$2,400	1,560 hrs.; \$156,000	2,400

Comments: Comments are invited on: (1) whether the collection of information is necessary for the proper performance of the functions of the Commission, including whether the information will have practical utility; (2) the accuracy of the agency’s estimate of the burden and cost of the collection

of information, including the validity of the methodology and assumptions used; (3) ways to enhance the quality, utility and clarity of the information collection; and (4) ways to minimize the burden of the collection of information on those who are to respond, including the use

of automated collection techniques or other forms of information technology.

Dated: April 17, 2024.

Debbie-Anne A. Reese,
Acting Secretary.
