SUPPLEMENTARY INFORMATION: The Homeland Security Presidential Directive-7, Presidential Policy Directive-21, and the National Infrastructure Protection Plan highlight the need for a centrally managed repository of infrastructure attributes capable of assessing risks and facilitating data sharing. The Critical Infrastructure Information Act of 2002 and Title 6 Code of Federal Regulation part 29 direct an information protection program and a system to record the receipt, acknowledgement, and validation of submitted critical infrastructure information (CII), as well as storage, dissemination, and destruction of original Protected Critical Infrastructure Information (PCII). To support these missions, the DHS CISA ISD developed the CISA Gateway and the Protected Critical Infrastructure Information Management System (PCIIMS). The CISA Gateway and PCIIMS contain several capabilities which support the homeland security mission in the area of critical infrastructure (CI) and information protection.

The purpose of this collection is to gather the details pertaining to the users of the CISA Gateway and PCIIMS for the purpose of creating accounts to access the CISA Gateway and PCIIMS. This information is also used to verify a need to know to access the CISA Gateway and PCIIMS. After being vetted and granted access, users are prompted and required to take an online training course upon first logging into the system. After completing the training, users are permitted full access to the systems. In addition, this collection will gather feedback from the users of the CISA Gateway to determine any future system improvements.
