Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; NOAA Fisheries Greater Atlantic Region Vessel Identification Requirements

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on February 14, 2024, during a 60-day comment period. This notice allows for an additional 30 days for public comments.

Agency: National Oceanic and Atmospheric Administration, Commerce.

Title: NOAA Fisheries Greater Atlantic Region Vessel Identification Requirements.

OMB Control Number: 0648–0350.

Form Number(s): None.

Type of Request: Regular submission (extension of a current information collection).

Number of Respondents: 3,935.

Average Hours per Response: 45 minutes (0.75 hours) to affix vessel information to the required locations.

Total Annual Burden Hours: 2,952.

Needs and Uses: This request is for extension of a current information collection. Regulations at 50 CFR 648.8 and 697.8 require that owners of vessels over 25 ft (7.6 m) in registered length that have federal permits to fish in the Greater Atlantic Region display the vessel's name and official number. The name and number must be of a specific size at specified locations: the vessel name must be affixed to the port and starboard sides of the bow and, if possible, on its stern. The official number must be displayed on the port and starboard sides of the deckhouse or hull, and on an appropriate weather deck to be clearly visible from enforcement vessels and aircraft. The success of fisheries management programs depends upon regulatory compliance. The vessel identification requirement, which is required of all federally permitted fishing vessels in the Greater Atlantic region, is essential to facilitate enforcement. The ability to link fishing or other activities to a vessel owner or operator are crucial to the enforcement of regulations issued under the authority of the Magnuson-Stevens Fishery Conservation and Management Act. When this information is clearly displayed, it enables enforcement personnel to easily identify Federal permit holders while engaged in fishing.

Affected Public: Individuals or households and business or other for-profit organizations.

Frequency: Once per year.

Respondent's Obligation: Mandatory.

Legal Authority: 50 CFR 648.8 and 697.8.
