

Anticipated Permits and Authorizations

If the proposed action is approved, the BLM would hold two competitive lease sales, one for each LBA, as outlined in 43 CFR part 3420—Competitive Leasing. Upon completion of each competitive lease sale, the BLM would award the leases to the successful bidder(s). Once a lease is issued, the Alabama Surface Mining Commission (ASMC) would be responsible for permitting the mining operations. The ASMC would determine whether to issue a permit and, if so, what terms and conditions to apply, in accordance with relevant policies and authorities. The Office of Surface Mining Reclamation and Enforcement (OSMRE) would prepare a mine plan decision document and make a recommendation to the Assistant Secretary for Land and Minerals Management regarding whether to approve, approve with conditions, or disapprove the mine plan.

Schedule for the Decision-Making Process

The BLM will provide additional opportunities for public participation consistent with the NEPA process, including a 45-day comment period on the Draft EIS. The Draft EIS is anticipated to be available for public review in autumn 2024, and the Final EIS is anticipated to be released in summer 2025 with a Record of Decision in early 2026.

Public Scoping Process

This notice of intent initiates the scoping period. The BLM requests that the public submit comments concerning the scope of the analysis, potential alternatives, and identification of relevant information, and studies by May 30, 2024. The BLM does not intend to hold any public meetings, in-person or virtual, during the public scoping period. If the BLM later determines that it will hold public meetings, the specific date(s) and location(s) of any meeting will be announced in advance through the ePlanning project page (see **ADDRESSES**) and local media.

Cooperating Agencies

OSMRE and the ASMC are cooperating agencies.

Responsible Official

The BLM Eastern States Director is the deciding official on the LBAs submitted by Warrior Met Coal.

Nature of Decision To Be Made

The responsible official will determine whether to offer lands identified in the LBAs ALES-055797

and ALES-056519 for Federal coal leasing and, if approved, what special stipulations to apply to the coal lease(s).

Additional Information

The BLM will identify, analyze, and consider mitigation to address the reasonably foreseeable impacts to resources from the proposed action and all analyzed reasonable alternatives and, in accordance with 40 CFR 1502.14(e), include appropriate mitigation measures not already included in the proposed action or alternatives. Mitigation may include avoidance, minimization, rectification, reduction or elimination over time, and compensation; and it may be considered at multiple scales, including the landscape scale.

The BLM will use and coordinate the NEPA process to help support compliance with applicable procedural requirements under the Endangered Species Act (16 U.S.C. 1536) and Section 106 of the National Historic Preservation Act (54 U.S.C. 306108), as provided in 36 CFR 800.2(d)(3), including public involvement requirements of Section 106. The information about historic and cultural resources and threatened and endangered species within the area potentially affected by the proposed project will assist the BLM in identifying and evaluating impacts to such resources.

The BLM will consult with Indian Tribal Nations on a government-to-government basis in accordance with Executive Order 13175, BLM Manual Section 1780, and other Departmental policies. Tribal concerns, including impacts on Indian trust assets and potential impacts to cultural resources, will be given due consideration. Federal, State, and local agencies, along with Indian Tribal Nations and stakeholders that may be interested in or affected by the two proposed LBAs for Federal coal that the BLM is evaluating, are invited to participate in the scoping process and, if eligible, may request or be requested by the BLM to participate in the development of the environmental analysis as a cooperating agency.
