l. *Description of Request:* Consolidated Water Power Company (Consolidated) proposes to remove approximately 130 acres of land from the project boundary and establish a new project boundary to follow a metes and bounds survey line. The 130 acres is part of a larger 132.06 acre parcel. The land proposed for removal is generally lowland marsh with pockets of upland deciduous and conifer stands. The lower one-third of the parcel is bisected by a drainage ditch which is connected to a series of ditches serving area cranberry growers. The land also incorporates an old, abandoned landfill previously operated by Consolidated's parent paper company that was closed in 1982. The closed landfill would continue to be monitored by the parent company in accordance with the original closure requirements. Consolidated also seeks Commission approval to transfer its fee-title ownership of this parcel back to its parent company or another entity in order to relieve itself of any potential liability associated with the landfill. Consolidated would retain flowage easements over the land. Consolidated anticipates that the parcel would be left undeveloped in the future and states that the parcel is not needed for project operations or flood control. Consolidated states the parcel has limited recreational opportunities due to its location and topography and contains no historical or cultural sites; and that no environmental effects are expected.
