Needs and Uses: The information collection requirements adopted in FCC 24–29 are as follows:

47 CFR 76.310 requires truth in billing and advertising:

47 CFR 76.310(a) requires cable operators and direct broadcast satellite (DBS) providers to state an aggregate price for the video programming that they provide as a clear, easy-to-understand, and accurate single line

item on subscribers' bills, including on bills for legacy or grandfathered video programming service plans. If a price is introductory or limited in time, cable and DBS providers shall state on subscribers' bills the date the price ends, by disclosing either the length of time that a discounted price will be charged or the date on which a time period will end that will result in a price change for video programming, and the post-promotion rate 60 and 30 days before the end of any introductory period. Cable operators and DBS providers may complement the aggregate line item with an itemized explanation of the elements that compose that single line item.

47 CFR 76.310(b) requires cable operators and DBS providers that communicate a price for video programming in promotional materials to state the aggregate price for the video programming in a clear, easy-to-understand, and accurate manner. If part of the aggregate price for video programming fluctuates based upon service location, then the provider must state where and how consumers may obtain their subscriber-specific "all-in" price (for example, electronically or by contacting a customer service or sales representative). If part or all of the aggregate price is limited in time, then the provider must state the post-promotion rate, as calculated at that time, and the duration of each rate that will be charged. Cable operators and DBS providers may complement the aggregate price with an itemized explanation of the elements that compose that aggregate price. The requirement in this paragraph (b) shall not apply to the marketing of legacy or grandfathered video programming service plans that are no longer generally available to new customers. For purposes of this section, the term "promotional material" includes communications offering video programming to consumers such as advertising and marketing.

This action is necessary as this is the opportunity for members of the public and organizations to submit comments on drafts of the profiles. The intended effect of this action is to ensure that the public can note any pertinent additional information or reports on studies about the health effects caused by exposure to the substances covered in these three profiles for review.

SUPPLEMENTARY INFORMATION:

ATSDR has prepared drafts of three updated toxicological profiles based on current understanding of the health effects and availability of new studies and other information since their initial release. All toxicological profiles issued as "Drafts for Public Comment" represent the result of ATSDR's evidence-based evaluations of the available literature to provide important toxicological information on priority hazardous substances to the public and health professionals. ATSDR considers key studies for these substances during the profile development process, using a systematic review approach. To that end, ATSDR is seeking public comments and additional information or reports on studies about the health effects of these substances for review and potential inclusion in the profiles. ATSDR will evaluate the quality and relevance of such data or studies for possible inclusion in the profile.

Legislative Background

The Superfund Amendments and Reauthorization Act of 1986 (SARA) (42 U.S.C. 9601 *et seq.*) amended the Comprehensive Environmental Response, Compensation, and Liability Act of 1980 (CERCLA or Superfund) (42 U.S.C. 9601 *et seq.*) by establishing certain requirements for ATSDR and the U.S. Environmental Protection Agency (EPA) regarding the hazardous substances most commonly found at facilities on the CERCLA National Priorities List. Among these statutory requirements is a mandate for the Administrator of ATSDR to prepare

toxicological profiles for each substance included on the priority list of hazardous substances (also called the Substance Priority List (SPL)). This list identifies 275 hazardous substances that ATSDR has determined pose the most significant potential threat to human health. The SPL is available online at <http://www.atsdr.cdc.gov/SPL>. ATSDR is also mandated to revise and publish updated toxicological profiles, as necessary, to reflect updated health effects and other information.

In addition, CERCLA provides ATSDR with the authority to prepare toxicological profiles for substances not found on the SPL. CERCLA authorizes ATSDR to establish and maintain an inventory of literature, research, and studies on the health effects of toxic substances (CERCLA section 104(i)(1)(B); 42 U.S.C. 9604(i)(1)(B)); to respond to requests for health consultations (CERCLA section 104(i)(4); 42 U.S.C. 9604(i)(4)); and to support the site-specific response actions conducted by the agency (CERCLA section 104(i)(6); 42 U.S.C. 9604(i)(6)).

Availability

The draft toxicological profiles and interaction profile are available online at <http://www.regulations.gov>, Docket No. ATSDR-2024-0001 and at <http://www.atsdr.cdc.gov/ToxProfiles>.
