

members of the public. Registration for the webinar is available by contacting the SEDAR coordinator via email at [Julie.Neer@safmc.net](mailto:Julie.Neer@safmc.net).

*SEDAR address:* South Atlantic Fishery Management Council, 4055 Faber Place Drive, Suite 201, N Charleston, SC 29405; [www.sedarweb.org](http://www.sedarweb.org).

**FOR FURTHER INFORMATION CONTACT:** Julie Neer, SEDAR Coordinator, 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405; phone: (843) 571-4366; email: [Julie.Neer@safmc.net](mailto:Julie.Neer@safmc.net).

**SUPPLEMENTARY INFORMATION:** The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions, have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a three-step process including: (1) Data Workshop; (2) Assessment Process utilizing webinars; and (3) Review Workshop. The product of the Data Workshop is a data report which compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The product of the Assessment Process is a stock assessment report which describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The assessment is independently peer reviewed at the Review Workshop. The product of the Review Workshop is a Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, Highly Migratory Species Management Division, and Southeast Fisheries Science Center. Participants include: data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and non-governmental organizations (NGOs); international experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion at the SEDAR 92 Atlantic Blueline Tilefish LS-TWG Webinar I are as follows:

Discuss available data sources, review preliminary analysis, and provide guidance for next steps.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

#### Special Accommodations

This meeting is accessible to people with disabilities. Requests for auxiliary aids should be directed to the South Atlantic Fishery Management Council office (see **ADDRESSES**) at least 5 business days prior to the meeting.

**Note:** The times and sequence specified in this agenda are subject to change.

*Authority:* 16 U.S.C. 1801 *et seq.*

Dated: May 1, 2024.

**Rey Israel Marquez,**

*Acting Deputy Director, Office of Sustainable Fisheries, National Marine Fisheries Service.*

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

[RTID 0648-XD894]

#### Fisheries of the U.S. Caribbean; Southeast Data, Assessment, and Review (SEDAR); Public Meeting

**AGENCY:** National Marine Fisheries Service (NMFS), National Oceanic and Atmospheric Administration (NOAA), Commerce.

**ACTION:** Notice of SEDAR 84 Assessment Webinar II for U.S Caribbean yellowtail snapper and stoplight parrotfish.

**SUMMARY:** The SEDAR 84 assessment process of U.S. Caribbean yellowtail snapper and stoplight parrotfish will consist of a Data Workshop, and a series of assessment webinars, and a Review Workshop. See **SUPPLEMENTARY INFORMATION**.

**DATES:** The SEDAR 84 Assessment Webinar II will be held May 23, 2024, from 2 p.m. to 4 p.m., eastern time.

**ADDRESSES:** The meeting will be held via webinar. The webinar is open to members of the public. Those interested

in participating should contact Julie A. Neer at SEDAR (see **FOR FURTHER INFORMATION CONTACT**) to request an invitation providing webinar access information. Please request webinar invitations at least 24 hours in advance of each webinar.

*SEDAR address:* 4055 Faber Place Drive, Suite 201, North Charleston, SC 29405.

**FOR FURTHER INFORMATION CONTACT:** Julie A. Neer, SEDAR Coordinator; (843) 571-4366; email: [Julie.neer@safmc.net](mailto:Julie.neer@safmc.net).

**SUPPLEMENTARY INFORMATION:** The Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils, in conjunction with NOAA Fisheries and the Atlantic and Gulf States Marine Fisheries Commissions have implemented the Southeast Data, Assessment and Review (SEDAR) process, a multi-step method for determining the status of fish stocks in the Southeast Region. SEDAR is a multi-step process including: (1) Data Workshop, (2) a series of assessment webinars, and (3) A Review Workshop. The product of the Data Workshop is a report that compiles and evaluates potential datasets and recommends which datasets are appropriate for assessment analyses. The assessment webinars produce a report that describes the fisheries, evaluates the status of the stock, estimates biological benchmarks, projects future population conditions, and recommends research and monitoring needs. The product of the Review Workshop is an Assessment Summary documenting panel opinions regarding the strengths and weaknesses of the stock assessment and input data. Participants for SEDAR Workshops are appointed by the Gulf of Mexico, South Atlantic, and Caribbean Fishery Management Councils and NOAA Fisheries Southeast Regional Office, HMS Management Division, and Southeast Fisheries Science Center. Participants include data collectors and database managers; stock assessment scientists, biologists, and researchers; constituency representatives including fishermen, environmentalists, and NGO's; International experts; and staff of Councils, Commissions, and state and federal agencies.

The items of discussion during the Assessment Webinar II are as follows:

Panelists will review and discuss initial assessment modeling to date.

Although non-emergency issues not contained in this agenda may come before this group for discussion, those issues may not be the subject of formal action during this meeting. Action will be restricted to those issues specifically identified in this notice and any issues

arising after publication of this notice that require emergency action under section 305(c) of the Magnuson-Stevens Fishery Conservation and Management Act, provided the public has been notified of the intent to take final action to address the emergency.

### Special Accommodations

The meeting is physically accessible to people with disabilities. Requests for sign language interpretation or other auxiliary aids should be directed to the Council office (see **ADDRESSES**) at least 5 business days prior to each workshop.

**Note:** The times and sequence specified in this agenda are subject to change.

*Authority:* 16 U.S.C. 1801 *et seq.*

Dated: May 1, 2024.

## DEPARTMENT OF COMMERCE

### National Oceanic and Atmospheric Administration

#### Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Tornado Watch/Warning Post-Event Evaluation

The Department of Commerce will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. We invite the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. Public comments were previously requested via the **Federal Register** on February 9th, 2024 during a 60-day comment period. This notice allows for an additional 30 days for public comments.

*Agency:* National Oceanic and Atmospheric Administration, Commerce.

*Title:* Tornado Watch/Warning Post-Event Evaluation.

*OMB Control Number:* 0648-0797.

*Form Number(s):* None.

*Type of Request:* Regular submission; revision.

*Number of Respondents:* Surveys: 1,200, Interviews: 50.

*Average Hours per Response:* Surveys: 5–10 minutes, Interviews: 15–30 minutes.

*Total Annual Burden Hours:* Survey: 200 hours, Interviews: 25 hours.

*Needs and Uses:* Each year over 1000 tornadoes affect communities across the United States, yet little is known about how individuals receive, interpret, and respond to information from NOAA relating to this hazard. In fact, only a small sample of tornadoes ever receive study, and most often those are only the most violent tornadoes. No generalizable, or even relatively large-scale information on tornado forecast and warning response after real-world events exists. The NOAA National Weather Service (NWS) and National Severe Storms Laboratory (NSSL) designed the data collection instrument to allow for more routine collection of this information. Respondents include members of the United States public who have been in or near a tornado, received a tornado warning, or were in or near a strong storm that made them concerned about tornadoes. They answer questions about the ways they received, understood, and responded to information about the event, including NWS watch and warning information. This survey is delivered through a web application hosted by NSSL called Tornado Tales, available online at <https://inside.nssl.noaa.gov/tornado-tales/>.

After approval of our initial data collection instrument (that shown on the website), the OU Cooperative Institute for Severe and High-Impact Weather Research and Operations (CIWRO) and NOAA NSSL Behavioral Insights Unit carried out post-event data collections for multiple tornado events, validating the questions and identifying issues for improvement. This fieldwork led to several needed improvements, including the addition of questions about the event more broadly, changing some response types, rephrasing some questions that were interpreted too broadly, and including questions about efficacy and the availability of forecast information to individuals. While the revisions have added questions to the survey, their improved clarity should allow for faster response times per question. We estimate the time to complete the survey is five to ten minutes on average. Subject recruitment will primarily be done by NOAA NSSL and its partners advertising the survey via websites and social media outlets. In addition to these efforts, there is also the possibility that during post-storm damage assessment activities NWS forecasters may direct impacted

individuals to the Tornado Tales website.

In addition to the changes to the survey instrument, researchers at NOAA NSSL and at the OU CIWRO Behavioral Insights Unit would like to conduct interviews with emergency managers, broadcast meteorologists, and members of the public after certain tornado events. These more in-depth interviews will collect similar information to the survey instrument from members of the public, broadcast meteorologists, and Emergency Management personnel who recently experienced a tornado event. The interviews will walk respondents through a timeline of events leading up to the tornado event. Researchers will use a skip-logic approach, meaning participants will only answer questions about the time periods relevant to their personal experience. The purpose of these interviews will be to more thoroughly explore how residents, broadcast meteorologists, and Emergency Managers received, understood, and responded to tornado forecasts and warnings. Given the in-person nature of these interviews, we expect them to take between 15 and 30 minutes on average.

*Affected Public:* Individuals or households.

*Frequency:* On occasion.

*Respondent's Obligation:* Voluntary.

*Legal Authority:* N/A.

This information collection request may be viewed at [www.reginfo.gov](http://www.reginfo.gov). Follow the instructions to view the Department of Commerce collections currently under review by OMB.

Written comments and recommendations for the proposed information collection should be submitted within 30 days of the publication of this notice on the following website [www.reginfo.gov/public/do/PRAMain](http://www.reginfo.gov/public/do/PRAMain). Find this particular information collection by selecting "Currently under 30-day Review—Open for Public Comments" or by using the search function and entering either the title of the collection or the OMB Control Number 0648-0797.
