

The Ionizing Radiation Standard specifies a number of collection of information requirements. The basic purpose of the collections of information in the Ionizing Radiation Standard is to document that employers are providing their workers with protection from ionizing radiation exposure. The collections of information contained in the Standard include: monitoring worker exposure to ionizing radiation, posting caution signs at radiation areas, reporting worker overexposure to OSHA, maintaining exposure records, and providing exposure records to current and former workers.

II. Special Issues for Comment

OSHA has a particular interest in comments on the following issues:

- Whether the proposed information collection requirements are necessary for the proper performance of the agency's functions to protect workers, including whether the information is useful;
- The accuracy of OSHA's estimate of the burden (time and costs) of the information collection requirements, including the validity of the methodology and assumptions used;
- The quality, utility, and clarity of the information collected; and
- Ways to minimize the burden on employers who must comply; for example, by using automated or other technological information, and transmission techniques.

III. Proposed Actions

OSHA is requesting that OMB extend the approval of the information collection requirements contained in the Ionizing Radiation Standard. The agency is requesting an adjustment increase of 11,479 burden hours from 59,077 to 70,556 hours. This increase is primarily due to increasing the percentage of affected establishments that may be using ionizing radiation in each industry identified as using ionizing radiation. Also, the agency is requesting an adjustment increase in capital cost from \$8,892,917 to \$11,461,149, a total increase of \$2,568,232. The increase is due to increases in both the estimated number of employees being monitored and the costs for exposure monitoring badges.

OSHA will summarize the comments submitted in response to this notice and will include this summary in the request to OMB to extend the approval of the collection of information requirements.

Type of Review: Extension of a currently approved collection.

SUPPLEMENTARY INFORMATION: The Institute of Museum and Library Services (IMLS) is the primary source of federal support for the nation’s libraries and museums. We advance, support, and empower America’s museums, libraries, and related organizations through grant making, research, and policy development. To learn more, visit www.imls.gov.

Current Actions: The purpose of this collection is to administer the IMLS process by which organizations nominated for the National Medal for Museum and Library Service submit administrative information about their organizations, communities, and programs. IMLS uses a standardized electronic form to collect this information from museums and libraries when they submit their nominations. The National Medal for Museum and Library Service is the nation’s highest honor for institutions that make

significant and exceptional contributions to their communities. Since 1994, IMLS has presented the award to institutions that demonstrate extraordinary and innovative approaches to community service. In addition to the Medal, IMLS may provide a monetary award. This action is to renew the content, form, and instructions for the next three years.
