

6(f)(1)(C) (7 U.S.C. 136d(f)(1)(C)) requires that EPA provide a 180-day comment period on a request for voluntary cancellation or termination of any minor agricultural use before granting the request, unless:

1. The registrants request a waiver of the comment period, or
2. The EPA Administrator determines that continued use of the pesticide would pose an unreasonable adverse effect on the environment.

The registrants have not requested that EPA waive the 180-day comment period. Accordingly, EPA will provide a 180-day comment period on the proposed requests.

IV. Procedures for Withdrawal of Requests

Registrants who choose to withdraw a request for product cancellation or use termination should submit the withdrawal in writing to the person listed under **FOR FURTHER INFORMATION CONTACT**. If the products(s) have been subject to a previous cancellation action, the effective date of cancellation and all other provisions of any earlier cancellation action are controlling.

V. Provisions for Disposition of Existing Stocks

Existing stocks are those stocks of registered pesticide products that are currently in the United States and that were packaged, labeled, and released for shipment prior to the effective date of the action. If the requests for voluntary cancellation and/or amendments to terminate uses are granted, the Agency intends to publish the cancellation order in the **Federal Register**.

In any order issued in response to these requests for cancellation of a product registration and/or for an amendment to terminate uses, EPA proposes to include the following provisions for the treatment of any existing stocks of the products listed in tables 1 and 2 of unit II.

For: 85588-13

For 85588-13, AgSurf Corporation, the registrant of the product subject to this cancellation notice, requests an existing stocks provision allowing the continued sale and distribution of the affected product until 18 months after the cancellation is published in the **Federal Register**.

For all other voluntary product cancellations, registrants will be permitted to sell and distribute existing stocks of voluntarily canceled products for 1 year after the effective date of the cancellation, which will be the date of publication of the cancellation order in the **Federal Register**. Thereafter,

registrants will be prohibited from selling or distributing the products identified in table 1 of unit II, except for export consistent with FIFRA section 17 (7 U.S.C. 136o) or for proper disposal.

Once EPA has approved product labels reflecting the requested amendments to terminate uses, registrants will be permitted to sell or distribute products under the previously approved labeling for a period of 18 months after the date of **Federal Register** publication of the cancellation order, unless other restrictions have been imposed. Thereafter, registrants will be prohibited from selling or distributing the products whose labels include the terminated uses identified in table 2 of unit II, except for export consistent with FIFRA section 17 or for proper disposal.

Persons other than the registrant may sell, distribute, or use existing stocks of canceled products and/or products whose labels include the terminated uses until supplies are exhausted, provided that such sale, distribution, or use is consistent with the terms of the previously approved labeling on, or that accompanied, the canceled products and/or terminated uses.

Number of Respondents and Responses: 1,380 respondents; 165,009 responses.

Estimated Time per Response: 0.25–5 hours.

Needs and Uses: The Commission is requesting Office of Management and Budget (OMB) approval for a revision to a currently approved information collection. In *Accelerating Wireline Broadband Deployment by Removing Barriers to Infrastructure Investment*, WC Docket No. 17–84, Fourth Report and Order, FCC 23–109 (rel. December 15, 2023) (Order), the Commission adopted rules that implement the pole attachment requirements in section 224 of the Communications Act of 1934, as amended. The Order substantially revised 47 CFR 1.1411, redesignated existing 47 CFR 1.1415 as 47 CFR 1.1416, and added a new 47 CFR 1.1415.

Section 1.1411. In the Order, the Commission adopted regulations requiring utilities to share information about their poles with prospective telecommunications and cable attachers. The Commission created this requirement to help improve the attachment process and potentially reduce disputes, thus facilitating broadband deployment. Specifically, the Order requires utilities to provide to potential attachers, upon request, the information contained in their most recent cyclical pole inspection reports, or any intervening, periodic reports created before the next cyclical inspection, for the poles covered by a submitted attachment application, including whether any of the affected poles have been “red tagged” by the utility for replacement and the scheduled replacement date or timeframe (if any). For the purposes of this new transparency requirement, a cyclical pole inspection report is any report that a utility creates in the normal course of its business that sets forth the results of the routine inspection of its poles during the utility’s normal pole inspection cycle, while a periodic pole inspection report is any report that a utility creates in the normal course of its business that sets forth the results of the inspection of any of its poles outside the utility’s normal pole inspection cycle.
