FOR FURTHER INFORMATION CONTACT: Tilda Liu, Office of Nuclear Material Safety and Safeguards, U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001; telephone: 404-997-4730, email: Tilda.Liu@nrc.gov.

SUPPLEMENTARY INFORMATION: By letter dated May 4, 2023 (ADAMS Accession No. ML23157A101), YAEC submitted a request to the NRC for an exemption from paragraphs 50.82(a)(8)(i)(A) and 50.75(h)(2) of title 10 of the *Code of Federal Regulations* (10 CFR) for the YNPS Independent Spent Fuel Storage Installation¹ (ISFSI).

¹ As discussed in this document, the Yankee Rowe ISFSI sits on the former site of Yankee Rowe, which YAEC finished decommissioning in 2007.

YAEC has established a separate (segregated) account within its overarching NDT, entitled "ISFSI Radiological Decom," that identifies the funds for radiological decommissioning of the ISFSI apart from the larger balance of funds in the NDT allocated for ongoing management of SNF and GTCC waste and for non-radiological site restoration activities. Although 10 CFR 50.82 applies to the segregated account, it does not apply to the overall NDT.

The exemption from 10 CFR 50.82(a)(8)(i)(A) and 50.75(h)(2) allows YAEC to make withdrawals from the segregated account, on an annual basis, for SNF and GTCC waste management and non-radiological site restoration without prior notification to the NRC. More specifically, with this exemption, YAEC can annually transfer funds exceeding 110 percent of the inflation-adjusted Decommissioning Cost Estimate, described in 10 CFR 50.75, from the segregated account to its overarching NDT and use those funds for SNF and GTCC waste management and non-radiological site restoration.

Based on the review, the NRC determined that, pursuant to 10 CFR 50.12(a), the exemption is authorized by law, will not present an undue risk to the public health and safety, and is consistent with the common defense and security. Also, the NRC determined that special circumstances are present. Therefore, the NRC granted YAEC an exemption from the requirements of 10 CFR 50.82(a)(8)(i)(A) and 10 CFR 50.75(h)(2) to permit YAEC to make withdrawals from the segregated account, on an annual basis, for SNF and GTCC waste management and non-radiological site restoration without prior notification to the NRC. All other relevant requirements shall be met. On April 11, 2024, the NRC issued an exemption for YAEC (ADAMS Package Accession No. ML23298A052). The NRC staff also prepared an environmental assessment and finding of no significant impact regarding the proposed exemption request, published in the **Federal Register** on April 9, 2024 (89 FR 24877), and concluded that the proposed exemption would not have a significant impact on the quality of the human environment.

Although only the Yankee Rowe ISFSI remains on the site, YAEC's 10 CFR part 50 license, Facility Operating License No. DPR-3, remains in effect. Because YAEC requested an exemption from the requirements of 10 CFR part 50, this would be an exemption for YAEC's 10 CFR part 50 license rather than for YAEC's 10 CFR part 72 general license. Therefore, although YAEC's submission requested an exemption for the Yankee Rowe ISFSI, the NRC staff will consider it a request for an exemption for YNPS.

Dated: May 2, 2024.

Chief, Storage and Transportation Licensing Branch, Division of Fuel Management, Office of Nuclear Material Safety and Safeguards.

II. Background

In accordance with the Paperwork Reduction Act of 1995 (44 U.S.C. Chapter 35), the NRC is requesting public comment on its intention to request the OMB's approval for the information collection summarized as follows.

1. *The title of the information collection:* 10 CFR part 26, "Fitness for Duty Programs."
2. *OMB approval number:* 3150–0146.
3. *Type of submission:* Extension.
4. *The form number, if applicable:* NRC Form 890, "Single Positive Test Form"; NRC Form 891, "Annual Reporting Form for Drug and Alcohol Tests"; and NRC Form 892, "Annual Fatigue Reporting Form."
5. *How often the collection is required or requested:* Annually and on occasion. The NRC receives reports on an annual basis that detail the Fitness for Duty (FFD) Program performance. The NRC also receives, on occasion, reports associated with FFD policy violations or programmatic failures. Depending on the type of violation or programmatic failure, the report would be made within 24 hours of the event occurrence, or within 30 days of completing an investigation into a programmatic failure.

6. *Who will be required or asked to respond:* Nuclear power reactor licensees licensed under 10 CFR part 50, "Domestic Licensing of Production and Utilization Facilities" and 10 CFR part 52, "Licenses, Certifications, and Approvals for Nuclear Power Plants" (except those who have permanently ceased operations and have verified that fuel has been permanently removed from the reactor); all holders of nuclear power plant construction permits and early site permits with a limited work authorization and applicants for nuclear power plant construction permits that have a limited work authorization under the provisions of 10 CFR part 50; all

holders of a combined license for a nuclear power plant issued under 10 CFR part 52 and applicants for a combined license that have a limited work authorization; all licensees who are authorized to possess, use, or transport formula quantities of strategic special nuclear material (SSNM) under the provisions of 10 CFR part 70, "Domestic Licensing of Special Nuclear Material"; all holders of a certificate of compliance of an approved compliance plan issued under 10 CFR part 76 "Certification of Gaseous Diffusion Plants," if the holder engages in activities involving formula quantities of SSNM; and all contractor/vendors (C/Vs) who implement FFD programs or program elements to the extent that the licensees and other entities listed in this paragraph rely on those C/V FFD programs or program elements to comply with 10 CFR part 26.

7. *The estimated number of annual responses:* 324,646 responses (254 reporting responses + 49 recordkeepers + 324,343 third-party disclosure responses).

8. *The estimated number of annual respondents:* 64,392 respondents (28 drug and alcohol testing programs + 21 fatigue management programs + 64,343 third party respondents).

9. *The estimated number of hours needed annually to comply with the information collection requirement or request:* 540,050 (5,301 hours reporting + 169,746 hours recordkeeping + 365,003 hours third-party disclosure)

10. *Abstract:* The NRC regulations in 10 CFR part 26 prescribe requirements to establish, implement, and maintain FFD programs at affected licensees and other entities. The objectives of these requirements are to provide reasonable assurance that persons subject to the rule are trustworthy, reliable, and not under the influence of any substance, legal or illegal, or mentally or physically impaired from any cause, which in any way could adversely affect their ability to safely and competently perform their duties. These requirements also provide reasonable assurance that the effects of fatigue and degraded alertness on individual's abilities to safely and competently perform their duties are managed commensurate with maintaining public health and safety. The information collections required by 10 CFR part 26 are necessary to properly manage FFD programs and to enable effective and efficient regulatory oversight of affected licensees and other entities. These licensees and other entities must perform certain tasks, maintain records, and submit reports to comply with 10 CFR part 26 drug and alcohol and fatigue management

requirements. These records and reports are necessary to enable regulatory inspection and evaluation of a licensee's or other entity's compliance with NRC regulations, FFD performance, and significant FFD-related events to help maintain public health and safety, promote the common defense and security, and protect the environment.

III. Specific Requests for Comments

The NRC is seeking comments that address the following questions:

1. Is the proposed collection of information necessary for the NRC to properly perform its functions? Does the information have practical utility? Please explain your answer.

2. Is the estimate of the burden of the information collection accurate? Please explain your answer.

3. Is there a way to enhance the quality, utility, and clarity of the information to be collected?
