

day period for public comment on the ICR.

DATES: Interested persons are invited to submit comments on or before June 10, 2024.

ADDRESSES: Written comments and recommendations for the proposed ICR should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find the particular ICR by selecting “Currently under Review—Open for Public Comments” or by using the search function.

FOR FURTHER INFORMATION CONTACT: Ms. Arlette Mussington, Information Collection Clearance Officer, at email: arlette.mussington@dot.gov or telephone: (571) 609–1285 or Ms. Joanne Swafford, Information Collection Clearance Officer, at email: joanne.swafford@dot.gov or telephone: (757) 897–9908.

SUPPLEMENTARY INFORMATION: The PRA, 44 U.S.C. 3501–3520, and its implementing regulations, 5 CFR part 1320, require Federal agencies to issue two notices seeking public comment on information collection activities before OMB may approve paperwork packages. See 44 U.S.C. 3506, 3507; 5 CFR 1320.8 through 1320.12. On February 21, 2024, FRA published a 60-day notice in the **Federal Register** soliciting public comment on the ICR for which it is now seeking OMB approval. See 89 FR 13142. FRA has received no comments related to the proposed collection of information.

Before OMB decides whether to approve this proposed collection of information, it must provide 30-days’ notice for public comment. Federal law requires OMB to approve or disapprove paperwork packages between 30 and 60 days after the 30-day notice is published. 44 U.S.C. 3507(b)–(c); 5 CFR 1320.12(d); See also 60 FR 44978, 44983, Aug. 29, 1995. OMB believes the 30-day notice informs the regulated community to file relevant comments and affords the agency adequate time to digest public comments before it renders a decision. 60 FR 44983, Aug. 29, 1995. Therefore, respondents should submit their respective comments to OMB within 30 days of publication to best ensure having their full effect.

Comments are invited on the following ICR regarding: (1) whether the information collection activities are necessary for FRA to properly execute its functions, including whether the information will have practical utility; (2) the accuracy of FRA’s estimates of the burden of the information collection activities, including the validity of the methodology and assumptions used to

determine the estimates; (3) ways for FRA to enhance the quality, utility, and clarity of the information being collected; and (4) ways to minimize the burden of information collection activities on the public, including the use of automated collection techniques or other forms of information technology.

The summary below describes the ICR that FRA will submit for OMB clearance as the PRA requires:

Title: Metrics and Minimum Standards for Intercity Passenger Rail Service.

OMB Control Number: 2130–0632.

Abstract: In November 2020, in connection with a Congressional mandate, FRA published a final rule titled Metrics and Minimum Standards for Intercity Passenger Train Operations. (49 CFR part 273). The final rule established metrics and a minimum standard for measuring the performance and service quality of intercity passenger train operations, including cost recovery, on-time performance and minutes of delay, ridership, on-board services, stations, facilities, equipment, and other services.¹

Affected Public: Amtrak.

Form(s): N/A.

Respondent Universe: Amtrak and Host Railroad(s).

Frequency of Submission: Varied.

Total Estimated Annual Responses: 93.

SUPPLEMENTARY INFORMATION: Section 1320.8(d), title 5, Code of Federal Regulations (CFR) requires the Pipeline and Hazardous Materials Safety Administration (PHMSA) to provide interested members of the public and affected agencies an opportunity to comment on information collection and recordkeeping requests. This notice identifies information collection requests PHMSA will be submitting to OMB for renewal and extension. These information collections are contained in 49 CFR 171.6 of the Hazardous Materials Regulations (HMR; 49 CFR parts 171–180). PHMSA has revised burden estimates, where appropriate, to reflect current reporting levels or adjustments based on changes in proposed or final rules published since

the information collections were last approved. The following information is provided for each information collection: (1) title of the information collection, including former title if a change is being made; (2) OMB control number; (3) summary of the information collection activity; (4) description of affected public; (5) estimate of total annual reporting and recordkeeping burden; and (6) frequency of collection. PHMSA will request a 3-year term of approval for each information collection activity and will publish a notice in the **Federal Register** upon OMB’s approval. PHMSA requests comments on the following information collections:

Title: Flammable Cryogenic Liquids.

OMB Control Number: 2137–0542.

Summary: Provisions in § 177.840(a)(2) specify certain safety procedures and documentation requirements for drivers of motor vehicles transporting flammable cryogenic liquids. This information allows the driver to take appropriate remedial actions to prevent a catastrophic release of the flammable cryogenics should the temperature of the material begin to rise excessively or if the travel time will exceed the safe travel time. These requirements are intended to ensure a high level of safety when transporting flammable cryogenics due to their extreme flammability and high compression ratio when in a liquid state. The following information collections and their burdens are associated with this OMB Control Number.

Information collection	Respondents	Total annual responses	Time per response	Total annual burden hours
Flammable Cryogenic Liquids—Reporting	175	18,200	3.5 minutes	1,062
Flammable Cryogenic Liquids—Recordkeeping	175	18,200	30 seconds	152

Affected Public: Carriers of cryogenic materials.
Annual Reporting and Recordkeeping Burden:
Number of Respondents: 350.
Total Annual Responses: 36,400.
Total Annual Burden Hours: 1,214.

Frequency of Collection: On occasion.
Title: Response Plans for Shipments of Oil.
OMB Control Number: 2137–0591.
Summary: Under authority of the Federal Water Pollution Control Act, as amended by the Oil Pollution Act of

1990 (33 U.S.C. 1251 *et seq.*), PHMSA issued regulations in 49 CFR part 130 that require preparation of written spill response plans. The following information collections and their burdens are associated with this OMB Control Number.

Information collection	Respondents	Total annual responses	Time per response (hours)	Total annual burden hours

Total Annual Burden Hours: 10,560.

Frequency of Collection: On occasion.
Title: Requirements for United Nations (UN) Cylinders.
OMB Control Number: 2137–0621.

Summary: This information collection and recordkeeping burden is the result of efforts to amend the HMR to adopt standards for the design, construction, maintenance, and use of cylinders and multiple-element gas containers (MEGCs) based on the standards contained in the UN Recommendations on the Transport of Dangerous Goods. Aligning the HMR with the UN Recommendations promotes flexibility, permits the use of technological advances for the manufacture of the

pressure receptacles, provides for a broader selection of pressure receptacles, reduces the need for special permits, and facilitates international commerce in the transportation of compressed gases. Information collection requirements address domestic and international manufacturers of cylinders that request approval by the approval agency for cylinder design types. The approval process for each cylinder design type includes review, filing, and

recordkeeping of the approval application. The approval agency is required to maintain a set of the approved drawings and calculations for each design it reviews and a copy of each initial design type approval certificate approved by the Associate Administrator for the Office of Hazardous Materials Safety for not less than 20 years. The following information collections and their burdens are associated with this OMB Control Number.

Information collection	Respondents	Total annual responses	Time per response	Total annual burden hours
UN Pressure Receptacle Approval—New Request	35	35	6 hours	210
UN Pressure Receptacle Approval—Modified Request	100	100	6 hours	600
UN Pressure Receptacle Approval—Recordkeeping	75	75	6 minutes	8

Affected Public: Fillers, owners, users, and retesters of UN cylinders.
Annual Reporting and Recordkeeping Burden:

- Number of Respondents:* 210.
- Total Annual Responses:* 210.
- Total Annual Burden Hours:* 818.
- Frequency of Collection:* On occasion.

Issued in Washington, DC, on May 7, 2024, under authority delegated in 49 CFR 1.97.
