

Summary: This information collection and recordkeeping burden is the result of efforts to amend the HMR to adopt standards for the design, construction, maintenance, and use of cylinders and multiple-element gas containers (MEGCs) based on the standards contained in the UN Recommendations on the Transport of Dangerous Goods. Aligning the HMR with the UN Recommendations promotes flexibility, permits the use of technological advances for the manufacture of the

pressure receptacles, provides for a broader selection of pressure receptacles, reduces the need for special permits, and facilitates international commerce in the transportation of compressed gases. Information collection requirements address domestic and international manufacturers of cylinders that request approval by the approval agency for cylinder design types. The approval process for each cylinder design type includes review, filing, and

recordkeeping of the approval application. The approval agency is required to maintain a set of the approved drawings and calculations for each design it reviews and a copy of each initial design type approval certificate approved by the Associate Administrator for the Office of Hazardous Materials Safety for not less than 20 years. The following information collections and their burdens are associated with this OMB Control Number.

Information collection	Respondents	Total annual responses	Time per response	Total annual burden hours
UN Pressure Receptacle Approval—New Request	35	35	6 hours	210
UN Pressure Receptacle Approval—Modified Request	100	100	6 hours	600
UN Pressure Receptacle Approval—Recordkeeping	75	75	6 minutes	8

Affected Public: Fillers, owners, users, and retesters of UN cylinders.
