Abstract of Information Available

Based on the information available, human remains representing at least 14 individuals have been reasonably identified.

At minimum 14 individuals were believed to be removed between 1950 and 1980 from an unknown number of archaeological sites by avocational archaeologists associated with the Chenango Chapter of the New York State Archaeological Association (formally the Chenango Archaeological Society). The relationship between Theodore Whitney, an avocational archaeologist that donated materials and Ancestral remains to LMA, and the avocational Archaeologists in the Chenango Chapter of the New York State Archaeological Association (formally the Chenango Archaeological Society), along with the identified burials published in the Chenango Chapter bulletin, link these individuals to the Ancestral land of the Oneida Indian Nation. To date, the Ancestors removed from these sites have not been accounted for in other NAGPRA Inventories or past repatriations. Geographical affiliation from the Chenango Chapter excavations are consistent with the archaeologically documented territory of the Oneida Indian Nation.

Cultural Affiliation

Based on the information available and the results of consultation, cultural affiliation is reasonably identified by the acquisition history of the human remains described in this notice.

The LMA has determined that:

- The human remains described in this notice represent the physical remains of at least 14 individuals of Native American ancestry.
