Transmittal No. 22–09

Notice of Proposed Issuance of Letter of Offer Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The MH–60R Multi-Mission Helicopter focuses primarily on anti-submarine and anti-surface warfare missions. The MH–60R carries several sensors and data links to enhance its ability to work in a network centric battle group and as an extension of its home ship/main operating base. The mission equipment subsystem consists of the following sensors and subsystems: an acoustics systems consisting of a dipping sonar and sonobuoys, Multi-Mode Radar (MMR) with integral Identification Friend or Foe (IFF) interrogator, Radios with COMSEC, Electronic Support Measures (ESM), Integrated Self-Defense (ISD), and Multi-Spectral Targeting System (MTS). The aircraft processes sensor data onboard, and transmits data via Common Data Link (CDL) (also referred to as Hawklink). The aircraft is night vision compatible. It can carry AGM–114A/B/K/N Hellfire missiles to engage surface and sub-surface targets.

a. The AGM–114 Hellfire missile is an air-to-surface missile with a multimission, multi-target, precision strike capability. The Hellfire can be launched from multiple air platforms and is the primary precision weapon for the United States Army.

b. Advanced Precision Kill Weapon System (APKWS) laser guided rocket to counter the fast attack craft and fast inshore attack craft threat.

c. Communications security (COMSEC) devices contain sensitive encryption algorithms and keying material.

d. Identification Friend or Foe (IFF) (KIV–78) contains embedded security devices containing sensitive encryption algorithms and keying material.

e. GPS/PPS/SAASM—Global Positioning System (GPS) provides a

space-based Global Navigation Satellite System (GNSS) that has reliable location and time information in all weather and at all times and anywhere on or near the earth when and where there is an unobstructed line of sight to four or more GPS satellites. Selective Availability/Anti-Spoofing Module (SAASM) (AN/PSN–11) is used by military GPS receivers to allow decryption of precision GPS coordinates. In addition, the GPS Antenna System (GAS–1) provides protection from enemy manipulation of the GPS system.

f. Acoustics algorithms are used to process dipping sonar and sonobuoy data for target tracking and for the Acoustics Mission Planner (AMP), which is a tactical aid employed to optimize the deployment of sonobuoys and the dipping sonar.

g. The AN/APS–153 multi-mode radar with an integrated IFF and Inverse Synthetic Aperture (ISAR) provides target surveillance/detection capability.

h. The AN/ALQ–210 (ESM) system identifies the location of an emitter.

i. The AN/AAS–44C(V) Multi-Spectral Targeting System (MTS) operates in day/night and adverse weather conditions. Imagery is provided by a Forward Looking Infrared (FLIR) sensor, a color/monochrome day television (DTV) camera, and a Low-Light TV (LLTV).

j. Ultra High Frequency/Very High Frequency (UHF/VHF) Radios (ARC–210) contain embedded sensitive encryption algorithms and keying material.

k. Advanced Data Transfer System (ADTS) with Type 1 encryption for data at rest.

l. Satellite Communications Demand Assigned Multiple Access (SATCOM DAMA), which provides increased, interoperable communications capabilities with U.S. forces.

2. The highest level of classification of defense articles, components, and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of

the hardware and software elements, the information could be used to develop countermeasures or equivalent systems, which might reduce system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that Spain can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of Spain.
