Abstract: This collection of information enables the BLM to process assignments of record title interest and transfers of operating rights in a lease for oil and gas or geothermal resources. Each assignment or transfer is a contract between private parties but, by law, must be approved by the Secretary. The BLM uses information about assignments and transfers to prevent unlawful extraction of mineral resources, to ensure prompt payment of rentals and royalties for the rights obtained under a Federal lease, and to ensure that leases are not encumbered with agreements that cause the minerals to be uneconomical to produce, resulting in lost revenues to the Federal Government. The information also enables the BLM to ensure the assignee or transferee is in compliance with the bonding requirements, when necessary, before approval of the transfer or assignment. The BLM does not expect any changes to the burden hours for submissions; however, the BLM did update the information to be collected. The BLM added the legacy lease serial number field to capture the legacy serial number now that all leases have a new serial number based upon all records migrating into the Mineral & Land Records System. The BLM will also require the forms to include a company's principals, as defined under 2 CFR 180.995. The BLM requires the principal information to ensure the entity acquiring interest in the lease is not Federally suspended or debarred and is qualified to hold a lease. The BLM does not expect these additional fields to increase the burden as this information is readily available. Additionally, The BLM is adjusting the cost burden to reflect inflation adjustments. This adjustment will increase the total annual cost burden by \$132,270 (from \$881,800 to \$1,014,070). OMB control number 1004–0034 is currently scheduled to expire on September 30, 2024. The BLM plans to request that OMB renew this OMB control number for an additional three (3) years.
