Update of PM_{2.5} Data From T640/T640X PM Mass Monitors

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) is retroactively applying the approved modification of the Federal Equivalent Method (FEM) designation for the Teledyne Advanced Pollution Instrumentation Model T640 particulate matter (PM) mass monitor including the 640X option (hereafter T640 and T640X) to all of the concentration data for PM with a diameter 2.5 micrometers or smaller (PM_{2.5}) from the T640 and T640X monitors in the EPA's Air Quality System (AQS) that was reported prior to the modification. The EPA processed the unmodified hourly PM_{2.5} concentration data in AQS using collocated or paired ambient temperature when available.

DATES: Updated data will be available in AQS by May 13, 2024. Although not required, the EPA recommends that air agencies review the updated data by May 28, 2024, and contact their EPA Regional office with any questions.
