BJS is proposing to add the following items to the 2024 CJ-43A, all of which are likely available from the same databases as existing data elements and should pose minimal additional burden to the respondents, while enhancing BJS's ability to characterize the corrections system and populations it serves:

Based on high burden, low utilization, and/or low response rates in the 2019 CCF, BJS is proposing to remove the following items from the CJ-43A:

 - Number of security staff on average at facility by day shift, night shift, and overnight shift
 - Number of shared security staff with other administratively linked facilities
- Consistent with the most recent iteration of the CCF in 2019 the 2024 CJ-43B includes—
- Functions of the facility (e.g., general confinement, community corrections, reception/diagnostic, medical treatment confinement)
 - Percentage of inmates regularly permitted to leave the facility unaccompanied
 - Whether the facility is administratively linked to other facilities and if they are, names of other facilities
 - Type of authority operating the facility (e.g., federal, state, local, joint state and local, or private)
 - Whether the facility is authorized to house males, females, or both males and females
 - Number of inmates by sex on the reference date
