* As defined in Section 47(6) of the Arms Export Control Act.

POLICY JUSTIFICATION

The Netherlands—AIM-9X Block II Missiles

The Government of the Netherlands has requested to buy seventy-two (72) AIM-9X Block II Tactical Missiles; and forty-three (43) AIM-9X Block II+ Tactical Missiles that will be added to a previously implemented case. The original FMS case, valued at \$16.8 million, included twenty-three (23) AIM-9X Block II Tactical Missiles. The Netherlands has also requested a new FMS case for twenty-two (22) AIM-9X Block II Tactical Missiles; forty-three (43) AIM-9X Block II+ Tactical Missiles; and one (1) AIM-9X Block II+ Tactical Guidance Unit. Therefore, this notification is for a total of ninety-five (95) AIM-9X Block II Tactical Missiles; forty-three (43) AIM-9X Block II+ Tactical Missiles; and one (1) AIM-9X Block II+ Tactical Guidance Unit. Also included are containers; classified and unclassified software; U.S. Government and contractor technical assistance; and other related elements of logistical and program support. The total estimated cost is \$117 million.

This proposed sale will support the foreign policy and national security objectives of the United States by helping to improve the security of a North Atlantic Treaty Organization (NATO) ally that is an important force for political stability and economic progress in Europe.

The proposed sale will enable the Royal Netherlands Air Force (RNAF) to provide stronger support for the Netherlands' air defense needs. This proposed sale of AIM-9X missiles will improve the RNAF's capability to

conduct self-defense and regional security missions, enhancing interoperability with the U.S. and other NATO members. The Netherlands will have no difficulty absorbing these missiles into its armed forces.

The proposed sale of this equipment and support will not alter the basic military balance in the region.

The principal contractor will be Raytheon Missiles and Defense, Tucson, AZ. There are no known offset agreements proposed in connection with this potential sale.

Implementation of this sale will not require the assignment of any U.S. Government or contractor representatives to the Netherlands.

There will be no adverse impact on U.S. defense readiness as a result of this proposed sale.

Transmittal No. 22-25

Notice of Proposed Issuance of Letter of Offer and Acceptance Pursuant to Section 36(b)(1) of the Arms Export Control Act

Annex

Item No. vii

(vii) *Sensitivity of Technology:*

1. The AIM-9X Block II and Block II+ (Plus) Missile (including the Guidance Unit) replaces the AIM-9X Block I Missile configuration. The missile includes a high off-boresight seeker, enhanced countermeasure rejection capability, low drag/high angle of attack airframe and the ability to integrate the Helmet Mounted Cueing System. The software algorithms are the most sensitive portion of the AIM-9X missile. The software continues to be modified via a pre-planned product improvement (P3I) program in order to improve its counter-countermeasure capabilities. No software source code or algorithms will be released.

2. The highest level of classification of defense articles, components and services included in this potential sale is SECRET.

3. If a technologically advanced adversary were to obtain knowledge of the specific hardware and software elements, the information could be used to develop countermeasures that might reduce weapon system effectiveness or be used in the development of a system with similar or advanced capabilities.

4. A determination has been made that the Netherlands can provide substantially the same degree of protection for the sensitive technology being released as the U.S. Government. This sale is necessary in furtherance of the U.S. foreign policy and national security objectives outlined in the Policy Justification.

5. All defense articles and services listed in this transmittal have been authorized for release and export to the Government of the Netherlands.
