SUPPLEMENTARY INFORMATION:

I. Abstract

NASA is committed to effectively performing the Agency's communication function in accordance with the Space Act Section 203 (a)(3) to "provide for the widest practicable and appropriate dissemination of information concerning its activities and the results thereof," and to enhance public understanding of, and participation in, the nation's aeronautical and space program in accordance with the NASA Strategic Plan. The NASA Office of STEM Engagement (OSTEM) administers the agency's national stem engagement and education activities in support of the Space Act, including the performance assessment and evaluation of OSTEM projects, programs and NASA STEM engagement investments. This generic clearance will allow the NASA OSTEM to continue to test and pilot with subject matter experts, secondary students, higher education students, educators, and interested parties new and existing information collection forms and assessment instruments for the purposes of improvement and establishing validity and reliability characteristics of the forms and instruments. Existing information collections include the NASA Student STEM Inventory (Grades 4-12), NASA OSTEM Educator Professional Development (EPD) Pre- and Post-Workshop Learning Assessment (Surveys), NASA Internship Program Evaluation (Internship Retrospective Survey, Internship Experience Survey, and Semi-Structured Focus Group Protocol), NASA CONNECTS Evaluation Survey and Focus Group Protocol, MUREP Outcome Student Participant and Principal Investigator Focus Group Protocols. Forms and instruments to be tested include program application forms, customer satisfaction questionnaires, focus group protocols, and project activity survey instruments. Methodological testing will include focus group discussions, pilot surveys to test new individual question items as well as the complete form and instrument. In addition, test-retest and similar protocols will be used to determine reliability characteristics of the forms and instruments. Methodological testing will assure that forms and instruments accurately and consistently collect and measure what they are intended to measure and that data collection items are interpreted

precisely and consistently, all towards the goal of accurate Agency reporting while improving the execution of NASA STEM Engagement activities.
