

Comment Date: 5 p.m. ET 6/10/24.

Docket Numbers: ER24–2063–000.

Applicants: Lincoln Power, L.L.C.

Description: Tariff Amendment: Notice of Cancellation of Market-Based Rate Tariff to be effective 5/21/2024.

Filed Date: 5/20/24.

Accession Number: 20240520–5160.

Comment Date: 5 p.m. ET 6/10/24.

Docket Numbers: ER24–2064–000.

Applicants: PJM Interconnection, L.L.C.

Description: 205(d) Rate Filing: Notice of Cancellation of WMPA SA No. 7006, Queue AF2–221 to be effective 7/20/2024.

Filed Date: 5/20/24.

Accession Number: 20240520–5187.

Comment Date: 5 p.m. ET 6/10/24.

Docket Numbers: ER24–2065–000.

Applicants: Duke Energy Florida, LLC.

Description: 205(d) Rate Filing: DEF–SECI SA No. 143 Amended and Restated NITSA to be effective 4/21/2024.

Filed Date: 5/20/24.

Accession Number: 20240520–5188.

Comment Date: 5 p.m. ET 6/10/24.

The filings are accessible in the Commission's eLibrary system (<https://elibrary.ferc.gov/idmws/search/fercgensearch.asp>) by querying the docket number.

Any person desiring to intervene, to protest, or to answer a complaint in any of the above proceedings must file in accordance with Rules 211, 214, or 206 of the Commission's Regulations (18 CFR 385.211, 385.214, or 385.206) on or before 5:00 p.m. Eastern time on the specified comment date. Protests may be considered, but intervention is necessary to become a party to the proceeding.

eFiling is encouraged. More detailed information relating to filing requirements, interventions, protests, service, and qualifying facilities filings can be found at: <http://www.ferc.gov/docs-filing/efiling/filing-req.pdf>. For other information, call (866) 208–3676 (toll free). For TTY, call (202) 502–8659.

The Commission's Office of Public Participation (OPP) supports meaningful public engagement and participation in Commission proceedings. OPP can help members of the public, including landowners, environmental justice communities, Tribal members and others, access publicly available information and navigate Commission processes. For public inquiries and assistance with making filings such as interventions, comments, or requests for rehearing, the public is encouraged to contact OPP at (202) 502–6595 or OPP@ferc.gov.

Dated: May 20, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

BILLING CODE 6717–01–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 4472–031]

Union Falls Hydropower, L.P.; Notice of Reasonable Period of Time for Water Quality Certification Application

On May 20, 2024, New York State Department of Environmental Conservation (New York DEC) submitted to the Federal Energy Regulatory Commission (Commission) notice that it received a complete request for a Clean Water Act section 401(a)(1) water quality certification from Union Falls Hydropower, L.P., in conjunction with the above captioned project, on April 25, 2024. Pursuant to section 4.34(b)(5) of the Commission's regulations,¹ we hereby notify New York DEC of the following:

Date of Receipt of the Certification Request: April 25, 2024.

Reasonable Period of Time to Act on the Certification Request: One year, April 25, 2025.

If New York DEC fails or refuses to act on the water quality certification request on or before the above date, then the certifying authority is deemed waived pursuant to section 401(a)(1) of the Clean Water Act, 33 U.S.C. 1341(a)(1).

Dated: May 20, 2024.

Debbie-Anne A. Reese,

Acting Secretary.

BILLING CODE 6560–50–P

ENVIRONMENTAL PROTECTION AGENCY

[FRL–11963–01–OA]

Request for Nominations for the Science Advisory Board Microbial and Disinfection Byproducts (MDBP) Revisions Review Panel

AGENCY: Environmental Protection Agency (EPA).

ACTION: Notice.

SUMMARY: The Environmental Protection Agency (EPA) Science Advisory Board (SAB) Staff Office requests public nominations of scientific experts to form a Panel to review the draft analyses to support EPA's revisions of the Microbial and Disinfection Byproducts (MDBP) National Primary Drinking Water rules. EPA is currently conducting analyses to evaluate eight (*i.e.*, chlorite, Cryptosporidium, haloacetic acids, heterotrophic bacteria, Giardia lamblia, Legionella, total trihalomethanes, and viruses) National Primary Drinking Water Regulations (NPDWRs) for

potential regulatory revisions with a consideration of risk tradeoffs across microbial control versus disinfection byproduct formation. EPA is exploring approaches to determine how public water systems (PWSs) can achieve enhanced precursor removal to reduce disinfection byproduct (DBP) formation in drinking water. EPA's analysis summarizes the current literature on DBP precursor occurrence and treatment, identifies technology based on effectiveness and feasibility, and determines the unit cost of technologies for enhanced removal. EPA is also preparing analyses to support a numerical disinfectant residual requirement within the drinking water distribution system. This analysis will include an inventory on vulnerable PWSs, feasibility studies for maintaining a numerical disinfectant residual, and methods for assessing effectiveness of a numerical residual in controlling microbial growth in the distribution system including for opportunistic pathogens such as *Legionella*. The SAB MDBP Revisions Review Panel will consider whether the conclusions found in the EPA's analyses are clearly presented and scientifically supported. The Panel will also be asked to provide recommendations on how the analyses may be strengthened.

DATES: Nominations should be submitted by June 14, 2024 per the instructions below.

FOR FURTHER INFORMATION CONTACT: Any member of the public wishing further information regarding this Notice and Request for Nominations may contact Carolyn Kilgore, Designated Federal Officer (DFO), EPA Science Advisory Board via telephone/voice mail (202) 564-0230, or email at kilgore.carolyn@epa.gov. General information concerning the EPA SAB can be found at the EPA SAB website at <https://sab.epa.gov>.

SUPPLEMENTARY INFORMATION:

Background: The SAB (42 U.S.C. 4365) is a chartered Federal Advisory Committee that provides independent scientific and technical peer review, advice, and recommendations to the EPA Administrator on the technical basis for EPA actions. As a Federal advisory committee, the SAB conducts business in accordance with the Federal Advisory Committee Act (FACA) (5 U.S.C. app. 2) and related regulations. The SAB Staff Office is forming an expert panel, the SAB MDBP Revisions Review Panel, under the auspices of the Chartered SAB. The SAB MDBP Revisions Review Panel will provide advice through the chartered SAB. The SAB and the SAB MDBP Revisions

Review Panel will comply with the provisions of FACA and all appropriate SAB Staff Office procedural policies. The SAB MDBP Revisions Review Panel will conduct a review of analyses on two specific topics under consideration for potential regulatory revisions. EPA is exploring approaches to determine how PWSs can achieve enhanced precursor removal to reduce DBP formation in drinking water. EPA's analysis summarizes the current literature on DBP precursor occurrence and treatment, identifies technology based on effectiveness and feasibility, and determines the unit cost of technologies for enhanced removal. EPA is also preparing analyses to support a numerical disinfectant residual requirement within the drinking water distribution system.

This analysis will include an inventory on vulnerable PWSs, feasibility studies for maintaining a numerical disinfectant residual, and methods for assessing effectiveness of a numerical residual in controlling microbial growth in the distribution system including for opportunistic pathogens such as *Legionella*. The SAB MDBP Revisions Review Panel will consider whether the conclusions found in the EPA's draft analyses are clearly presented and scientifically supported. The Panel will also be asked to provide recommendations on how the analyses may be strengthened.

Request for Nominations: The SAB Staff Office is seeking nominations of nationally and internationally recognized scientists with demonstrated expertise in the following disciplines: *Environmental Engineering, specifically: design, operation, and maintenance of distribution systems used by public drinking water systems (PWS); Environmental Science; Drinking water treatment; Disinfection byproduct formation and control; Microbiology; Public Health; Water quality; Water reuse; Toxicology; Risk assessment; Environmental economics; Environmental health science.*

Process and Deadline for Submitting Nominations: Any interested person or organization may nominate qualified individuals in the areas of expertise described above for possible service on the SAB Panel. Individuals may self-nominate. Nominations should be submitted in electronic format (preferred) using the online nomination form on the SAB website at <https://sab.epa.gov> (see the "Public Input on Membership" list under "Committees, Panels, and Membership"). To be considered, nominations should include the information requested below. EPA values and welcomes diversity. All

qualified candidates are encouraged to apply regardless of sex, race, disability, or ethnicity.

Nominations should be submitted in time to arrive no later than June 14, 2024. The following information should be provided on the nomination form: contact information for the person making the nomination; contact information for the nominee; and the disciplinary and specific areas of expertise of the nominee. Nominees will be contacted by the SAB Staff Office and will be asked to provide a recent curriculum vitae and a narrative biographical summary that includes current position, educational background; research activities; and recent service on other national advisory committees or national professional organizations. Persons having questions about the nomination procedures, or who are unable to submit nominations through the SAB website, should contact the DFO at the contact information noted above. The names and biosketches of qualified nominees identified by respondents to this **Federal Register** notice, and additional experts identified by the SAB Staff Office, will be posted in a List of Candidates for the Panel on the SAB website at <https://sab.epa.gov>. Public comments on the List of Candidates will be accepted for 21 days. The public will be requested to provide relevant information or other documentation on nominees that the SAB Staff Office should consider in evaluating candidates.

For the EPA SAB Staff Office, a balanced review panel includes candidates who possess the necessary domains of knowledge, the relevant scientific perspectives (which, among other factors, can be influenced by work history and affiliation), and the collective breadth of experience to adequately address the charge. In forming the expert panel, the SAB Staff Office will consider public comments on the Lists of Candidates, information provided by the candidates themselves, and background information independently gathered by the SAB Staff Office. Selection criteria to be used for panel membership include: (a) scientific and/or technical expertise, knowledge, and experience (primary factors); (b) availability and willingness to serve; (c) absence of financial conflicts of interest; (d) absence of an appearance of a loss of impartiality; (e) skills working in committees, subcommittees and advisory panels; and, (f) for the panel as a whole, diversity of expertise and scientific points of view.

The SAB Staff Office's evaluation of an absence of financial conflicts of interest will include a review of the "Confidential Financial Disclosure Form for Environmental Protection Agency Special Government Employees" (EPA Form 3110-48). This confidential form is required and allows government officials to determine whether there is a statutory conflict between a person's public responsibilities (which include membership on an EPA federal advisory committee) and private interests and activities, or the appearance of a loss of impartiality, as defined by federal regulation. The form may be viewed and downloaded through the "Ethics Requirements for Advisors" link on the SAB website at <https://sab.epa.gov>. This form should not be submitted as part of a nomination.

The approved policy under which the EPA SAB Office selects members for subcommittees and review panels is described in the following document: *Overview of the Panel Formation Process at the Environmental Protection Agency Science Advisory Board* (EPA-SAB-EC-02-010), which is posted on the SAB website at <https://sab.epa.gov>.

V. Khanna Johnston,

Deputy Director, Science Advisory Board Staff Office.

BILLING CODE 6560-50-P

EXPORT-IMPORT BANK

[Public Notice: 2024-6041]

Agency Information Collection Activities: Proposed Collection; Comment Request; Generic Clearance for the Collection of Qualitative Feedback on Agency Service Delivery

AGENCY: Export-Import Bank of the United States.

ACTION: Submission for OMB review and comments request.

SUMMARY: The Export-Import Bank of the United States (EXIM), pursuant to the Export-Import Bank Act of 1945, as amended, facilitates the finance of the export of U.S. goods and services. As part of its continuing effort to reduce paperwork and respondent burden, EXIM invites the general public and other Federal agencies to comment on the proposed information collection, as required by the paperwork Reduction Act of 1995.

DATES: Comments must be received on or before July 23, 2024 to be assured of consideration.

ADDRESSES: Comments may be submitted electronically on www.regulations.gov (EIB 11-01), by email to Bryan Rolfe, Bryan.Rolfe@exim.gov, or by mail to Bryan Rolfe, Export-Import Bank of the United States, 811 Vermont Ave. NW, Washington, DC 20571.

Comments submitted in response to this notice may be made available to the public through the www.regulations.gov. For this reason, please do not include in your comments information of a confidential nature, such as sensitive personal information or proprietary information. If you send an email comment, your email address will be automatically captured and included as part of the comment that is placed in the public docket and made available on the internet. Please note that responses to this public comment request containing any routine notice about the confidentiality of the communication will be treated as public comments that may be made available to the public notwithstanding the inclusion of the routine notice.

FOR FURTHER INFORMATION CONTACT: To request additional information, please Bryan Rolfe, Bryan.Rolfe@exim.gov, 202-565-3809.

SUPPLEMENTARY INFORMATION: The proposed information collection activity provides a means to garner qualitative customer and stakeholder feedback in an efficient, timely manner, in accordance with the Administration's commitment to improving service delivery. By qualitative feedback we mean information that provides useful insights on perceptions and opinions but are not statistical surveys that yield quantitative results that can be generalized to the population of study. This feedback will provide insights into customer or stakeholder perceptions, experiences and expectations, provide an early warning of issues with service, or focus attention on areas where communication, training or changes in operations might improve delivery of products or services. These collections will allow for ongoing, collaborative and actionable communications between the Agency and its customers and stakeholders. It will also allow feedback to contribute directly to the improvement of program management.

The solicitation of feedback will target areas such as: timeliness, appropriateness, accuracy of information, courtesy, efficiency of service delivery, and resolution of issues with service delivery. Responses will be assessed to plan and inform efforts to improve or maintain the quality of service offered to the public.

If this information is not collected, vital feedback from customers and stakeholders on the Agency's services will be unavailable.

The Agency will only submit a collection for approval under this generic clearance if it meets the following conditions:

- The collections are voluntary;
- The collections are low-burden for respondents (based on considerations of total burden hours, total number of respondents, or burden-hours per respondent) and are low-cost for both the respondents and the Federal Government;
- The collections are non-controversial and do not raise issues of concern to other Federal agencies;
- Any collection is targeted to the solicitation of opinions from respondents who have experience with the program or may have experience with the program in the near future;
- Personally identifiable information (PII) is collected only to the extent necessary and is not retained;
- Information gathered will be used only internally for general service improvement and program management purposes and is not intended for release outside of the agency;
- Information gathered will not be used for the purpose of substantially informing influential policy decisions; and
- Information gathered will yield qualitative information; the collections will not be designed or expected to yield statistically reliable results or used as though the results are generalizable to the population of study.

Feedback collected under this generic clearance provides useful information, but it does not yield data that can be generalized to the overall population. This type of generic clearance for qualitative information will not be used for quantitative information collections that are designed to yield reliably actionable results, such as monitoring trends over time or documenting program performance. Such data uses require more rigorous designs that address: the target population to which generalizations will be made, the sampling frame, the sample design (including stratification and clustering), the precision requirements or power calculations that justify the proposed sample size, the expected response rate, methods for assessing potential non-response bias, the protocols for data collection, and any testing procedures that were or will be undertaken prior to fielding the study. Depending on the degree of influence the results are likely to have, such collections may still be eligible for submission for other generic
