SUPPLEMENTARY INFORMATION: According to the Robert T. Stafford Disaster Relief and Emergency Assistance Act (Stafford Act), 42 U.S.C. 5121, *et seq.*, FEMA is authorized to provide assistance before, during, and after a disaster has impacted a State, Tribe, or Territory (STT). For a major disaster, the Stafford Act authorizes FEMA to direct any agency to utilize its existing authorities and resources in support of STT assistance response and recovery efforts. *See* 42 U.S.C. 5170(a)(1). For an emergency, the Stafford Act authorizes FEMA to direct any agency to utilize its existing authorities and resources in support of STT emergency efforts. *See* 42 U.S.C. 5192(a)(1). FEMA may task other Federal Agencies to assist during disasters and to support emergency efforts by STT governments by issuing a mission assignment to the appropriate agency. *See* 44 CFR 206.5, 206.208. FEMA collects the information necessary to determine what resources are needed and if a mission assignment is appropriate. The information collected explains which STT requires assistance, what needs to be accomplished, details any resource shortfalls, and explains what assistance is required to meet these needs.

This proposed information collection previously published in the **Federal Register** on February 28, 2024, at 89 FR

14673 with a 60-day public comment period. No comments were received. The purpose of this notice is to notify the public that FEMA will submit the information collection abstracted below to the Office of Management and Budget for review and clearance.

The notice FEMA published at 89 FR 14673 published erroneous totals for the Estimated Number of Respondents, Estimated Number of Responses, Estimated Total Annual Burden Hours, Estimated Total Annual Respondent Cost, and Estimated Respondents’ Operation and Maintenance Costs due to the clerical error of not including one instrument in the calculations for the totals. The burden and cost numbers for that instrument is included in the totals published in this notice.

SUPPLEMENTARY INFORMATION: We, the U.S. Fish and Wildlife Service, invite review and comment from the public

and local, State, Tribal, and Federal agencies on applications we have received for permits to conduct certain activities with endangered and threatened species under section 10(a)(1)(A) of the Endangered Species Act of 1973, as amended (ESA; 16 U.S.C. 1531 *et seq.*), and our regulations in the Code of Federal Regulations (CFR) at 50 CFR part 17. Documents and other information submitted with the applications are available for review, subject to the requirements of the Privacy Act and the Freedom of Information Act.

Background

The ESA prohibits certain activities with endangered and threatened species unless authorized by a Federal permit. The ESA and our implementing regulations in part 17 of title 50 of the Code of Federal Regulations (CFR) provide for the issuance of such permits and require that we invite public comment before issuing permits for activities involving endangered species.

A recovery permit issued by us under section 10(a)(1)(A) of the ESA authorizes the permittee to conduct

activities with endangered species for scientific purposes that promote recovery or for enhancement of propagation or survival of the species. Our regulations implementing section 10(a)(1)(A) for these permits are found at 50 CFR 17.22 for endangered wildlife species, 50 CFR 17.32 for threatened wildlife species, 50 CFR 17.62 for endangered plant species, and 50 CFR 17.72 for threatened plant species.

Permit Applications Available for Review and Comment

The ESA requires that we invite public comment before issuing these permits. Accordingly, we invite local, State, Tribal, and Federal agencies and the public to submit written data, views, or arguments with respect to these applications. The comments and recommendations that will be most useful and likely to influence agency decisions are those supported by quantitative information or studies. Proposed activities in the following permit requests are for the recovery and enhancement of propagation or survival of the species in the wild.
