

Washington), which are listed under the ESA.

The NMFS OPR requested initiation of section 7 consultation with the NMFS West Coast Region (WCR) for the issuance of these IHAs. On April 29, 2024, WCR concluded that NMFS' current action remains covered by the programmatic Biological Opinion (WCRO-2016-00018) completed for the issuance of regulations preceding these IHAs (83 FR 9366, March 5, 2018), and that reinitiation of the consultation is not required. WCR specified that the new IHAs are consistent with the original effects analysis included in the original programmatic opinion, and OPR's action would not change the conclusions nor the effects of the proposed action as written in the Biological Opinion.

National Environmental Policy Act

To comply with the National Environmental Policy Act of 1969 (NEPA; 42 U.S.C. 4321 *et seq.*) and NOAA Administrative Order (NAO) 216-6A, NMFS must evaluate our action (*i.e.*, the issuance of two consecutive IHAs) with respect to potential impacts on the human environment.

This action is consistent with categories of activities identified in Categorical Exclusion B4 (IHAs with no anticipated serious injury or mortality) of the Companion Manual for NAO 216-6A, which do not individually or cumulatively have the potential for significant impacts on the quality of the human environment and for which we have not identified any extraordinary circumstances that would preclude this categorical exclusion. Accordingly, NMFS has determined that the issuance of the IHAs qualifies to be categorically excluded from further NEPA review.

Authorization

NMFS has issued two consecutive IHAs to the Navy for the potential harassment of small numbers of 10 marine mammal species incidental to the NAVFAC NW MPR Project in Puget Sound, Washington, that includes the previously explained mitigation, monitoring, and reporting requirements.

Dated: May 28, 2024.

Kimberly Damon-Randall,

Director, Office of Protected Resources,
National Marine Fisheries Service.

BILLING CODE 3510-22-P

DEPARTMENT OF COMMERCE

National Oceanic and Atmospheric Administration

Hydrographic Services Review Panel

AGENCY: National Ocean Service, National Oceanic and Atmospheric Administration (NOAA), Department of Commerce.

ACTION: Notice of solicitation of nominations for NOAA's Hydrographic Services Review Panel Federal Advisory Committee.

SUMMARY: NOAA is seeking nominations for members to serve on the Hydrographic Services Review Panel (HSRP) Federal Advisory Committee. Nominations are due by February 21, 2025.

DATES: Nominations for members to serve on the HSRP Federal Advisory Committee must be submitted by February 21, 2025, and will be kept on file and used for future HSRP vacancies. NOAA anticipates there will be five vacancies starting on January 1, 2026, each with a four-year term. Current members who may be eligible for a second term in 2026 must reapply. Pursuant to the Hydrographic Services Improvement Act, as amended (HSIA; 33 U.S.C. 892 *et seq.*), NOAA maintains an active pool of HSRP candidates and solicits nominations for HSRP candidates once each year.

ADDRESSES: Nominations will be accepted by email and should be sent to: *Hydroservices.panel@noaa.gov*. You will receive a confirmation response.

FOR FURTHER INFORMATION CONTACT: NOAA HSRP Program Manager, Ashley Chappell, email *Hydroservices.panel@noaa.gov* or phone: 240-429-0293.

SUPPLEMENTARY INFORMATION: Pursuant to the HSIA, NOAA shall solicit nominations for HSRP membership once each year (33 U.S.C. 892c). The HSRP advises the NOAA Administrator "on matters related to the responsibilities and authorities set forth in [the HSIA] and such other appropriate matters as the Administrator refers to the [HSRP] for review and advice." (33 U.S.C. 892c(b)(1).) The NOAA Administrator's responsibilities and authorities include promoting safe, efficient, and environmentally sound marine transportation under the Coast and Geodetic Survey Act (CGSA; 33 U.S.C. 883 *et seq.*). To promote safe, efficient, and environmentally sound marine transportation under the CGSA, the HSIA states that the NOAA Administrator shall,

1. acquire and disseminate hydrographic data and provide hydrographic services;
2. promulgate standards for hydrographic data and services;
3. ensure comprehensive geographic coverage of hydrographic services;
4. maintain a national database of hydrographic data, in cooperation with other appropriate Federal agencies;
5. provide hydrographic services in uniform, easily accessible formats; and
6. participate in the development of, and implement for the United States in cooperation with other appropriate Federal agencies, international standards for hydrographic data and services.

The HSRP has fifteen voting members appointed by the NOAA Administrator in accordance with the HSIA, 33 U.S.C. 892c. Voting members are individuals who, by reason of knowledge, experience, or training, are especially qualified in one or more disciplines relating to hydrographic data and services, marine transportation, port administration, vessel pilotage, coastal and fishery management, and other disciplines as determined appropriate by the NOAA Administrator. Two NOAA employees, the Directors of the National Geodetic Survey and the Center for Operational Oceanographic Products and Services, and the Co-Directors of the Center for Coastal and Ocean Mapping/Joint Hydrographic Center serve as non-voting members. The Director of the NOAA Office of Coast Survey serves as the Designated Federal Officer (DFO) along with two Alternate DFOs. Full-time officers or employees of the United States may not be appointed as voting members. Any voting member of the HSRP who is an applicant for or beneficiary of (as determined by the Administrator) any assistance under the HSIA shall disclose to the HSRP that relationship, and may not vote on any other matter pertaining to that assistance.

Voting members of the HSRP serve a four-year term, except that vacancy appointments are for the remainder of the unexpired term of the vacancy. Members serve at the Administrator's discretion and are subject to government ethics standards. Public meetings occur at least twice a year. Voting members receive compensation at a rate established by the Administrator, not to exceed the maximum daily rate payable under 5 U.S.C. 5376 when engaged in performing duties for the HSRP during the public meeting. Members are reimbursed for actual and reasonable travel expenses incurred in performing such duties according to Federal Travel Regulation.

Upon selection and agreement to serve on the HSRP, members become Special Government Employees (SGEs) of the United States Government. An SGE, as defined in 18 U.S.C. 202(a), is an officer or employee of an agency who is retained, designated, appointed, or employed to perform temporary duties, with or without compensation, not to exceed 130 days during any period of 365 consecutive days, either on a full time or intermittent basis. After the selection process is complete, applicants selected to serve on the HSRP must complete the following actions before they can be appointed as an HSRP member:

(a) Security Clearance (online Background Security Check process and fingerprinting conducted through NOAA's Office of Security and Office of Human Capital Services); and

(b) Confidential Financial Disclosure Report—SGEs are required to file a Confidential Financial Disclosure Report to avoid involvement in a real or apparent conflict of interest. You may find information on the Confidential Financial Disclosure Report: <https://www.oge.gov/Web/oge.nsf/Resources/OGE+Form+450>.

In accordance with the Federal Advisory Committee Act (FACA), as amended (5 U.S.C. app.), and the pertinent FACA Implementing Regulations (41 CFR 102–3.30(c)), NOAA seeks a balanced HSRP membership. Subject matter expertise, with subjects as specified in the HSIA, is the primary criterion considered in the evaluation process. Professional sector representation (academia, industry, research, scientific institution, State and local government, Tribal interests, consultant, non-governmental organization, etc.), geographic expertise, experience working productively with committees and working groups, and leadership with navigation, observations, and positioning are other criteria that will be considered. The diverse membership of the HSRP ensures expertise reflecting the full breadth of the HSRP's responsibilities.

NOAA requests nominations from individuals meeting the criteria above. Nominees are required to submit four items; the nomination package should include all components, be submitted in Microsoft Word and/or PDF, and be no longer than eight pages. The four required items are,

1. A cover letter that responds to the Five Short Response Questions noted below and serves as a statement of interest to serve on the HSRP. Please highlight the nominee's specific area(s) of expertise related to the disciplines

and fields described in 33 U.S.C. 892c(c).

2. A short biography of 300–400 words.

3. A resume of 3 pages maximum.

4. The nominee's full work and home contact information including: full name, work title, institutional affiliation, work and home mailing addresses, email address(es), phone number(s), and fax number. Please note preferred email, phone number and mailing address.

Five Short Response Questions for the Cover Letter

1. List your area(s) of expertise from the following list: Hydrographic data and services (e.g., tides, currents, geodetic, and geospatial measurements), marine transportation, port administration, vessel pilotage, coastal and fishery management, and other disciplines in the oceanographic or marine science areas.

2. List the geographic region(s) of the country with which you primarily associate your expertise from the following list: Northeast, Mid-Atlantic, Southeast, Gulf of Mexico, Pacific Northwest, California, Hawaii, Pacific Islands, Alaska, Arctic, Great Lakes, Caribbean, National, and/or International.

3. Describe your leadership or professional experiences that you believe will contribute to the HSRP.

4. Describe your familiarity and experience with NOAA navigation, observations and positioning data, products, and services.

5. Generally describe the breadth and scope of your knowledge of stakeholders, users, or other groups who interact with NOAA and whose views and input you believe you can share with the HSRP.

Additional HSRP information, including past HSRP public meeting summary reports, agendas, presentations, transcripts, webinars, and other information is available online at <https://www.nauticalcharts.noaa.gov/hsrp/>.

Authority: 33 U.S.C. 892 *et seq.*; 33 U.S.C. 883a *et seq.*

Benjamin K. Evans,

RDML, Director, Office of Coast Survey, National Ocean Service, National Oceanic and Atmospheric Administration.

BILLING CODE 3510–G1–P

DEPARTMENT OF ENERGY

Federal Energy Regulatory Commission

[Project No. 15353–000]

Hybrid Renewables LLC; Notice of Preliminary Permit Application Accepted for Filing and Soliciting Comments, Motions To Intervene, and Competing Applications

On May 13, 2024, Hybrid Renewables LLC, filed an application for a preliminary permit, pursuant to section 4(f) of the Federal Power Act (FPA), proposing to study the feasibility of a hydropower project to be located at the U.S. Army Corps of Engineers' (Corps) Oologah Lake Dam near the Town of Oologah, in Rogers County, Oklahoma. The sole purpose of a preliminary permit, if issued, is to grant the permit holder priority to file a license application during the permit term. A preliminary permit does not authorize the permit holder to perform any land-disturbing activities or otherwise enter upon lands or waters owned by others without the owners' express permission.

The proposed Oologah Lake Dam Hydroelectric Project would consist of the following: (1) an steel extension to the existing dam's left outlet conduit that would house a control valve and connect to; (2) a 19-foot-diameter, 228-foot-long steel penstock; (3) the penstock would split into two 16.5-foot-diameter, 58-foot-long and 49-foot-long penstocks before entering; (4) an 80-foot-long, 19-foot-wide, powerhouse containing two turbine-generator units with a total capacity of 24.0 megawatts; (5) a 100-foot-long, 63-foot-wide concrete tailrace; and (6) a .37-mile-long, 138 kilovolt transmission line with a new substation at its end. The proposed project would have an estimated annual generation of 64,600 megawatt-hours.

Applicant Contact: Tafweez Elahee Chauhan, Hybrid Renewables LLC, 1530 Key Blvd., Suite 1104, Arlington, VA 22209; phone: (703)-526–9797.

FERC Contact: Michael Spencer; phone: (202) 502–6093, or by email at michael.spencer@ferc.gov.

Deadline for filing comments, motions to intervene, competing applications (without notices of intent), or notices of intent to file competing applications: 60 days from the issuance of this notice. Competing applications and notices of intent must meet the requirements of 18 CFR 4.36.
