

In the instant case, as previously noted, the components in the kit from China consist of the left seat rail, right seat rail, left leg, right leg, front crossbar, back crossbar, bottom crossbar, 60mm bolts with Loctite, 40mm bolts with Loctite, 35mm bolts with Loctite, and 10mm x 40mm large wooden dowels. The U.S.-origin fabric, dust covers, and welt cord are cut to size and combined with the U.S.-origin foam to form the seat and the seat back. Based on the information presented, when the foreign components are integrated with the U.S. components, they lose their individual identities and become an integral part of a new article, the upholstered wood chair, possessing a new name, character and use. We, therefore, find that the last substantial transformation occurs in the United States. As to whether the upholstered wood chair produced in the United States qualifies as a “U.S.-made end product,” you may wish to consult with the relevant government procuring agency and review *Acetris Health, LLC v. United States*, 949 F.3d 719 (Fed. Cir. 2020).

Holding

Based on the information outlined above, we determine that the components imported into the United States undergo a substantial transformation when made into the subject upholstered wood chairs. Notice of this final determination will be given in the **Federal Register**, as required by 19 CFR 177.29. Any party-at-interest other than the party which requested this final determination may request, pursuant to 19 CFR 177.31, that CBP reexamine the matter anew and issue a new final determination. Pursuant to 19 CFR 177.30, any party-at-interest may, within 30 days of publication of the **Federal Register** Notice referenced above, seek judicial review of this final determination before the U.S. Court of International Trade.

Sincerely,
 Alice A. Kipel,
*Executive Director, Regulations and Rulings,
 Office of Trade.*
