

Proposed Project

Paul Coverdell National Acute Stroke Program (PCNASP) (OMB Control No. 0920–1108, Exp. 9/30/2024)—Extension—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

The Centers for Disease Control and Prevention (CDC), Division for Heart Disease and Stroke Prevention (DHDSP), requests an Extension of a previously approved data collection for a period of three years. The CDC is the primary Federal agency for protecting health and promoting quality of life through the prevention and control of disease, injury, and disability. CDC is committed to programs that reduce the health and economic consequences of the leading causes of death and disability, thereby ensuring a long, productive, healthy life for all people.

Stroke remains a leading cause of serious, long-term disability and is the fifth leading cause of death in the United States after heart disease, cancer, chronic lower respiratory diseases, and accidents. Estimates indicate that approximately 795,000 suffer a first-ever or recurrent stroke each year with more than 145,000 deaths annually. Although there have been significant advances in preventing and treating stroke, the rising prevalence of heart disease, diabetes,

and obesity has increased the relative risk for stroke, especially in African American populations. There is a critical need to improve access to and quality of care for those at highest risk for events and stroke patients among the continuum of care, particularly among high burden populations. Coverdell-funded State programs are in the forefront of developing and implementing system-change efforts to improve stroke systems of care using strategies like linking and using data, using team-based approaches to coordinate stroke care, and providing community resources to reach the general populations and specifically those at highest risk of stroke events, and reduce disparities in access to quality care for high burden populations.

When Congress directed the Centers for Disease Control and Prevention (CDC) to establish the Paul Coverdell National Acute Stroke Program (PCNASP) in 2001, CDC intended to monitor trends in stroke and stroke care, with the ultimate mission of improving the quality of care for stroke patients in the United States. Since 2021, CDC has funded and provided technical assistance to thirteen recipients to develop comprehensive stroke systems of care. A comprehensive system of care improves quality of care by creating seamless transitions for individuals experiencing stroke. In such a system,

pre-hospital providers, in-hospital providers, and early post-hospital providers coordinate patient hand-offs and ensure continuity of care.

While PCNASP has existed since 2001, the goal and mission of the program has evolved with each funding cycle. The 2021–2024 funding cycle is the first such initiative to focus on addressing health equity specifically and understanding efforts to impact stroke outcomes for those at highest risk of stroke. CDC proposes to continue collecting information from thirteen funded PCNASP recipients to gain insight into the effectiveness of implementation approaches, including linking and using data, using team-based approaches to coordinate stroke care, and providing community resources in order to reach the general population and those at highest risk of stroke events, and reduce disparities in access to quality care for high burden populations. The insights to be gained from this continuing data collection will be critical to improving immediate efforts and achieving the goals of spreading and replicating State-level strategies that are proven programmatically and are cost-effective in contributing to a higher quality of care for stroke patients.

CDC requests OMB approval for an estimated 501 annual burden hours. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
PCNASP Awardee	Hospital inventory	13	1	8	104
	In-hospital care data	13	4	30/60	26
	Pre-hospital care data	3	4	30/60	6
		10	4	1	40
PCNASP Hospital Partners	Hospital Inventory	650	1	30/60	325
Total					501

Jeffrey M. Zirger,

Agency Forms Undergoing Paperwork Reduction Act Review

In accordance with the Paperwork Reduction Act of 1995, the Centers for Disease Control and Prevention (CDC) has submitted the information collection request titled “National Center for Chronic Disease Prevention

and Health Promotion: Work Plans, Progress Monitoring, and Evaluation Reporting (NCCDPHP WPPMER)” to the Office of Management and Budget (OMB) for review and approval. CDC previously published a “Proposed Data Collection Submitted for Public Comment and Recommendations” notice on December 1, 2023 to obtain comments from the public and affected agencies. CDC received two comments related to the previous notice. This notice serves to allow an additional 30 days for public and affected agency comments.

CDC will accept all comments for this proposed information collection project. The Office of Management and Budget is particularly interested in comments that:

(a) Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the agencies estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected;

(d) Minimize the burden of the collection of information on those who are to respond, including, through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses; and

(e) Assess information collection costs.

To request additional information on the proposed project or to obtain a copy

of the information collection plan and instruments, call (404) 639-7570. Comments and recommendations for the proposed information collection should be sent within 30 days of publication of this notice to www.reginfo.gov/public/do/PRAMain. Find this particular information collection by selecting “Currently under 30-day Review—Open for Public Comments” or by using the search function. Direct written comments and/or suggestions regarding the items contained in this notice to the Attention: CDC Desk Officer, Office of Management and Budget, 725 17th Street NW, Washington, DC 20503 or by fax to (202) 395-5806. Provide written comments within 30 days of notice publication.

Proposed Project

NCCDPHP Work Plans, Progress Monitoring, and Evaluation Reporting—New—National Center for Chronic Disease Prevention and Health Promotion (NCCDPHP), Centers for Disease Control and Prevention (CDC).

Background and Brief Description

Each year, more than 80% of the Centers for Disease Control and

Prevention (CDC) and the National Center for Chronic Disease Prevention and Health Promotion’s (NCCDPHP) budget is distributed to awardees such as State health departments, universities, and other organizations, primarily through cooperative agreements. The structure of cooperative agreements is such that awardees and CDC project officers, subject matter experts, and technical monitors work together on designing projects intended to improve public health. CDC/NCCDPHP seeks OMB approval to use Generic Information Collection Request (ICR) templates to collect work plan, monitoring, and/or evaluation information from cooperative agreement awardees.

NCCDPHP does not currently have a single information collection mechanism that encompasses all collection needs for all cooperative agreements. The purpose of this generic ICR is to allow the creation of individualized templates or forms for each phase of each award. OMB approval is requested for three years. The total annualized burden hours are 21,380. There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Type of form	Number of respondents	Number of responses per respondent	Average burden per response (in hours)
Comprehensive Cancer Control Program Award Recipients	Evaluation Plan	66	1	6
National Breast and Cervical Cancer Early Detection Program Award Recipients.	Work Plan	64	1	6
National Program of Cancer Registries Award Recipients	Evaluation Report	50	1	12
Other CDC/NCCDPHP Award Recipients	Other Reporting Forms ...	2,000	1	10

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Centers for Disease Control and Prevention

[60Day-24-1102; Docket No. CDC-2024-0047]

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

ACTION: Notice with comment period.

SUMMARY: The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of government information, invites the general public and other Federal agencies the opportunity to comment on a continuing information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Information Collection for Tuberculosis Data from Panel Physicians. The data collection is designed to collect tuberculosis (TB) data from medical exams of U.S.—bound immigrants and refugees who seek permanent residence in the U.S.

DATES: CDC must receive written comments on or before August 5, 2024.

ADDRESSES: You may submit comments, identified by Docket No. CDC-2024-0047 by either of the following methods:

- **Federal eRulemaking Portal:** www.regulations.gov. Follow the instructions for submitting comments.
- **Mail:** Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21-8, Atlanta, Georgia 30329.

Instructions: All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to www.regulations.gov.

Please note: Submit all comments through the Federal eRulemaking portal (www.regulations.gov) or by U.S. mail to the address listed above.

FOR FURTHER INFORMATION CONTACT: To request more information on the proposed project or to obtain a copy of
