

collection forms. In this Revision, CDC requests OMB approval for an estimated annual burden of 6,455,846 hours.

There is no cost to respondents other than their time to participate.

ESTIMATED ANNUALIZED BURDEN HOURS

Type of respondent	Form No.	Form	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Microbiologist .....	57.102	COVID-19 Hospital Data Form (excluding Psychiatric and Rehabilitation Facilities).	5,200	365	90/60	2,847,000
Microbiologist .....	57.103	COVID-19 Hospital Data Form (Psychiatric and Rehabilitation Facilities).	870	365	90/60	476,325
Microbiologist .....	57.140	National Healthcare Safety Network (NHSN) Registration Form .....	11,500	1	5/60	958
	57.144	COVID-19 and Respiratory Pathogens Module Long Term Care Facility: Resident Impact and Facility Capacity Pathway.	16,500	52	25/60	357,500
Microbiologist .....	57.145	COVID-19 Module, Long Term Care Facility: Staff and Personnel Impact form.	11,621	52	5/60	50,358
Microbiologist .....	57.155	Point of Care Testing Results .....	6,270	200	10/60	209,000
Microbiologist .....	57.159	VA Resident COVID-19 Event Form-LTCF .....	195	25	35/60	2,844
Microbiologist .....	57.160	VA Staff and Personnel COVID-19 Event Form-LTCF .....	176	25	30/60	2,200
Microbiologist .....	57.218	Weekly Respiratory Pathogen and Vaccination Summary for Residents of Long-Term Care Facilities (CSV).	16,500	52	25/60	357,500
Microbiologist .....	57.219	Healthcare Personnel COVID-19 Vaccination Cumulative Summary (CSV).	32,900	76	45/60	1,875,300
Microbiologist .....	57.220	Weekly Person Level Respiratory Pathogen and Vaccination for Residents of Long-Term Care Facilities-Long-term Care Facility Component (Manual Entry).	1,600	52	60/60	83,200
Microbiologist .....	57.220	Weekly Person Level Respiratory Pathogen and Vaccination for Residents of Long-Term Care Facilities-Long-term Care Facility Component (CSV Entry).	1,600	52	40/60	55,467
Microbiologist .....	57.221	Healthcare Personnel COVID-19 Person Level Vaccination-Long-Term Care Component (Manual).	73	76	60/60	5,548
Microbiologist .....	57.221	Healthcare Personnel COVID-19 Person Level Vaccination-Long-Term Care Component (CSV).	73	76	40/60	3,699
Microbiologist .....	57.221	Healthcare Personnel COVID-19 Person Level Vaccination-Healthcare Personnel Safety Component (Manual).	73	76	60/60	5,548
Microbiologist .....	57.221	Healthcare Personnel COVID-19 Person Level Vaccination-Healthcare Personnel Safety Component (CSV).	73	76	40/60	3,699
Microbiologist .....	57.509	Weekly Patient COVID-19 Vaccination Cumulative Summary for Dialysis Facilities.	7,700	12	75/60	115,500
Microbiologist .....	57.510	COVID-19 Module Dialysis Outpatient Facility .....	150	56	30/60	4,200
Total .....						6,455,846

**DEPARTMENT OF HEALTH AND HUMAN SERVICES**

**Centers for Disease Control and Prevention**

[60Day-24-24FZ; Docket No. CDC-2024-0048]

**Proposed Data Collection Submitted for Public Comment and Recommendations**

**AGENCY:** Centers for Disease Control and Prevention (CDC), Department of Health and Human Services (HHS).

**ACTION:** Notice with comment period.

**SUMMARY:** The Centers for Disease Control and Prevention (CDC), as part of its continuing effort to reduce public burden and maximize the utility of

government information, invites the general public and other Federal agencies the opportunity to comment on a proposed information collection, as required by the Paperwork Reduction Act of 1995. This notice invites comment on a proposed information collection project titled Annual Progress Reports for Injury Control Research Centers (ICRC). ICRCs focus on research, training, and outreach for issues of local and national importance, including the prevention of adverse childhood experiences, child abuse and neglect, drowning, drug overdose, intimate partner violence, older adult falls, sexual violence, suicide, and traumatic brain injuries, as well as the promotion of transportation safety.

**DATES:** CDC must receive written comments on or before August 5, 2024.

**ADDRESSES:** You may submit comments, identified by Docket No. CDC-2024-0048 by either of the following methods:

- *Federal eRulemaking Portal:* [www.regulations.gov](http://www.regulations.gov). Follow the instructions for submitting comments.

- *Mail:* Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21-8, Atlanta, Georgia 30329.

*Instructions:* All submissions received must include the agency name and Docket Number. CDC will post, without change, all relevant comments to [www.regulations.gov](http://www.regulations.gov).

*Please note:* Submit all comments through the Federal eRulemaking portal ([www.regulations.gov](http://www.regulations.gov)) or by U.S. mail to the address listed above.

**FOR FURTHER INFORMATION CONTACT:** To request more information on the proposed project or to obtain a copy of the information collection plan and instruments, contact Jeffrey M. Zirger, Information Collection Review Office, Centers for Disease Control and Prevention, 1600 Clifton Road NE, MS H21-8, Atlanta, Georgia 30329; Telephone: 404-639-7570; Email: [omb@cdc.gov](mailto:omb@cdc.gov).

**SUPPLEMENTARY INFORMATION:** Under the Paperwork Reduction Act of 1995 (PRA) (44 U.S.C. 3501-3520), Federal agencies

must obtain approval from the Office of Management and Budget (OMB) for each collection of information they conduct or sponsor. In addition, the PRA also requires Federal agencies to provide a 60-day notice in the **Federal Register** concerning each proposed collection of information, including each new proposed collection, each proposed extension of existing collection of information, and each reinstatement of previously approved information collection before submitting the collection to the OMB for approval. To comply with this requirement, we are publishing this notice of a proposed data collection as described below.

The OMB is particularly interested in comments that will help:

1. Evaluate whether the proposed collection of information is necessary for the proper performance of the functions of the agency, including whether the information will have practical utility;
2. Evaluate the accuracy of the agency's estimate of the burden of the proposed collection of information, including the validity of the methodology and assumptions used;
3. Enhance the quality, utility, and clarity of the information to be collected;
4. Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submissions of responses; and
5. Assess information collection costs.

**Proposed Project**

Annual Progress Reports for Injury Control Research Centers (ICRC)—New—National Center for Injury Prevention and Control (NCIPC), Centers for Disease Control and Prevention (CDC).

*Background and Brief Description*

In 1987, the Centers for Disease Control and Prevention (CDC) and the National Center for Injury Prevention and Control (NCIPC) began funding Injury Control Research Centers (ICRCs) at academic research institutions throughout the United States. ICRCs focus on three core functions—research, training, and outreach—for issues of local and national importance, including the prevention of adverse childhood experiences; child abuse and neglect; drowning; drug overdose; intimate partner violence; older adult falls; sexual violence; suicide; and traumatic brain injuries, and the promotion of transportation safety. ICRCs foster multidisciplinary strategies for addressing these complex problems and disseminating research findings. In addition to conducting cutting-edge, multidisciplinary research, ICRCs train and develop the current and next generation of researchers and public health professionals to help ensure that there is an adequate supply of qualified practitioners and researchers for advancing prevention research, addressing new problems, and reaching new populations across the nation. Finally, ICRCs work with States and communities to translate research findings into action. ICRCs provide partner organizations with technical assistance on programs, public health infrastructure, and the integration of resources at the local, State, and national levels. Areas of emphasis within each ICRC are determined by the expertise of the faculty and the public health needs and opportunities identified through the ICRC's outreach activities. This collaborative approach is a vital component in the success of efforts to make an impact on population-level reduction in injury-related harm.

ICRCs form a national network of expertise and innovation in injury

prevention and control. ICRC grants are typically funded in five-year funding cycles. The Centers for Disease Control and Prevention (CDC) requests OMB approval to electronically collect annual progress report (APR) information and Success Stories from the 11 currently funded ICRCs. Grantees will report progress and activity information to CDC on an annual schedule using a web-based CAMP. The information that will be collected will provide crucial data for program performance monitoring and will improve CDC's ability to respond in a timely manner to requests for information about the program from the Department of Health and Human Services (HHS), the White House, Congress, and other sources. The information that will be collected will also strengthen CDC's ability to monitor grantee progress towards stated grant research, training, and outreach objectives, provide data-driven technical assistance, and disseminate Success Stories about what's working to reduce unintentional and intentional injuries. This data collection will improve and innovate through evaluation, research, and quality improvement; investigate, diagnose, and address health hazards and root causes; communicate effectively to inform and educate; strengthen, support, and mobilize communities and partnerships; and create, champion, and implement policies, plans. CDC ICRC grantees perform all of these activities, and the systematic collection of data, annually, is the best way for CDC to understand this work. This APR information collection will enable grantees to submit accurate, reliable, and timely activity and performance data to the CDC.

CDC requests OMB approval for an estimated 183 annual burden hours. There is no cost to participants other than their time.

**ESTIMATED ANNUALIZED BURDEN HOURS**

Type of respondents	Form name	Number of respondents	Number of responses per respondent	Average burden per response (in hours)	Total burden (in hours)
Injury Research Center (ICRC) Grantees.	Injury Control Research Indicators Data Collection.	11	1	8	88

## DEPARTMENT OF HEALTH AND HUMAN SERVICES

### Centers for Disease Control and Prevention

[60Day-24-0572; Docket No. CDC-2024-  
0044]

#### Proposed Data Collection Submitted for Public Comment and Recommendations

**AGENCY:** Centers for Disease Control and  
Prevention (CDC), Department of Health  
and Human Services (HHS).

**ACTION:** Notice with comment period.

**SUMMARY:** The Centers for Disease  
Control and Prevention (CDC), as part of  
its continuing effort to reduce public  
burden and maximize the utility of  
government information, invites the  
general public and other Federal  
agencies the opportunity to comment on  
a continuing information collection, as  
required by the Paperwork Reduction  
Act of 1995. This notice invites  
comment on a proposed information  
collection project titled Health Message  
Testing System (HMTS). The HMTS is  
a Generic information collection that  
enables programs across CDC to test  
proposed health messages on a target  
audience before these messages are  
disseminated to the public.

**DATES:** CDC must receive written  
comments on or before August 5, 2024.

**ADDRESSES:** You may submit comments,  
identified by Docket No. CDC-2024-  
0044 by any of the following methods:

- *Federal eRulemaking Portal:*  
[www.regulations.gov](http://www.regulations.gov). Follow the  
instructions for submitting comments.
- *Mail:* Jeffrey M. Zirger, Information  
Collection Review Office, Centers for  
Disease Control and Prevention, 1600  
Clifton Road NE, MS H21-8, Atlanta,  
Georgia 30329.

*Instructions:* All submissions received  
must include the agency name and  
Docket Number. CDC will post, without  
change, all relevant comments to  
[www.regulations.gov](http://www.regulations.gov).

*Please note:* Submit all comments  
through the Federal eRulemaking portal  
([www.regulations.gov](http://www.regulations.gov)) or by U.S. mail to  
the address listed above.

**FOR FURTHER INFORMATION CONTACT:** To  
request more information on the  
proposed project or to obtain a copy of

the information collection plan and  
instruments, contact Jeffrey M. Zirger,  
Information Collection Review Office,  
Centers for Disease Control and  
Prevention, 1600 Clifton Road NE, MS  
H21-8, Atlanta, Georgia 30329;  
Telephone: 404-639-7570; Email: [omb@cdc.gov](mailto:omb@cdc.gov).

**SUPPLEMENTARY INFORMATION:** Under the  
Paperwork Reduction Act of 1995 (PRA)  
(44 U.S.C. 3501-3520), Federal agencies  
must obtain approval from the Office of  
Management and Budget (OMB) for each  
collection of information they conduct  
or sponsor. In addition, the PRA also  
requires Federal agencies to provide a  
60-day notice in the **Federal Register**  
concerning each proposed collection of  
information, including each new  
proposed collection, each proposed  
extension of existing collection of  
information, and each reinstatement of  
previously approved information  
collection before submitting the  
collection to the OMB for approval. To  
comply with this requirement, we are  
publishing this notice of a proposed  
data collection as described below.

The OMB is particularly interested in  
comments that will help:

1. Evaluate whether the proposed  
collection of information is necessary  
for the proper performance of the  
functions of the agency, including  
whether the information will have  
practical utility;
2. Evaluate the accuracy of the  
agency's estimate of the burden of the  
proposed collection of information,  
including the validity of the  
methodology and assumptions used;
3. Enhance the quality, utility, and  
clarity of the information to be  
collected;
4. Minimize the burden of the  
collection of information on those who  
are to respond, including through the  
use of appropriate automated,  
electronic, mechanical, or other  
technological collection techniques or  
other forms of information technology,  
*e.g.*, permitting electronic submissions  
of responses; and
5. Assess information collection costs.

#### Proposed Project

Health Message Testing System  
(HMTS) (OMB Control No. 0920-0572,  
Exp. 10/31/2024)—Extension—Office of  
Communication (OC), Centers for  
Disease Control and Prevention (CDC).

#### Background and Brief Description

Before CDC disseminates a health  
message to the public, the message  
always undergoes scientific review.  
However, even though the message is  
based on sound scientific content, there  
is no guarantee that the public will

understand a health message or that the  
message will move people to take  
recommended action. Communication  
theorists and researchers agree that for  
health messages to be as clear and  
influential as possible, target audience  
members or representatives must be  
involved in developing the messages  
and provisional versions of the  
messages must be tested with members  
of the target audience. Increasingly there  
are circumstances when CDC must  
move swiftly to protect life, prevent  
disease, or calm public anxiety. Health  
message testing is even more important  
in these instances, because of the  
critical nature of the information need.

In the interest of timely health  
message dissemination, many programs  
forgo the important step of testing  
messages on dimensions such as clarity,  
salience, appeal, and persuasiveness  
(*i.e.*, the ability to influence behavioral  
intention). Skipping this step avoids the  
delay involved in the standard OMB  
review process, but at a high potential  
cost. Untested messages can waste  
communication resources and  
opportunities because the messages can  
be perceived as unclear or irrelevant.  
Untested messages can also have  
unintended consequences, such as  
jeopardizing the credibility of Federal  
health officials.

The Health Message Testing System  
(HMTS) is a Generic information  
collection, that enables programs across  
CDC to collect the information they  
require in a timely manner to:

- Ensure quality and prevent waste in  
the dissemination of health information  
by CDC to the public.
- Refine message concepts and to test  
draft materials for clarity, salience,  
appeal, and persuasiveness to target  
audiences.
- Guide the action of health  
communication officials who are  
responding to health emergencies,  
Congressionally-mandated campaigns  
with short timeframes, media-generated  
public concern, time-limited  
communication opportunities, trends,  
and the need to refresh materials or  
dissemination strategies in an ongoing  
campaign.

Each testing instrument will be based  
on specific health issues or topics.  
Although it is not possible to develop  
one instrument for use in all instances,  
the same kinds of questions are asked in  
most message testing. This package  
includes generic questions and formats  
that can be used to develop health  
message testing data collection  
instruments. These include a list of  
screening questions, comprised of  
demographic and introductory  
questions, along with other questions
