

Public Participation and Request for Comments

This notice relies on the authority of the Paperwork Reduction Act of 1995; 44 U.S.C. 3501 *et seq.*, chapter 35, as amended. An ICR is an application to OIRA seeking the approval, extension, or renewal of a Coast Guard collection of information (Collection). The ICR contains information describing the Collection's purpose, the Collection's likely burden on the affected public, an explanation of the necessity of the Collection, and other important information describing the Collection. There is one ICR for each Collection.

The Coast Guard invites comments on whether this ICR should be granted based on the Collection being necessary for the proper performance of Departmental functions. In particular, the Coast Guard would appreciate comments addressing: (1) the practical utility of the Collection; (2) the accuracy of the estimated burden of the Collection; (3) ways to enhance the quality, utility, and clarity of information subject to the Collection; and (4) ways to minimize the burden of the Collection on respondents, including the use of automated collection techniques or other forms of information technology.

In response to your comments, we may revise this ICR or decide not to seek an extension of approval for the Collection. We will consider all comments and material received during the comment period.

We encourage you to respond to this request by submitting comments and related materials. Comments must contain the OMB Control Number of the ICR and the docket number of this request, USCG–2024–0340, and must be received by August 9, 2024.

Information Collection Request

Title: Plan Approval and Records for Marine Engineering Systems—46 CFR Subchapter F.

OMB Control Number: 1625–0097.

Summary: This collection of information requires an owner or builder of a commercial vessel to submit to the U.S. Coast Guard for review and approval, plans pertaining to marine engineering systems to ensure that the vessel will meet regulatory standards.

Need: Under 46 U.S.C. 3306, the Coast Guard is authorized to prescribe vessel safety regulations including those related to marine engineering systems. Title 46 CFR subchapter F prescribes those requirements. The rules provide the specifications, standards and requirements for strength and adequacy of design, construction, installation, inspection, and choice of materials for machinery, boilers, pressure vessels, safety valves, and piping systems upon which safety of life is dependent.

Forms: None.

Respondents: Owners and operators of commercial vessels.

Frequency: On occasion.

Hour Burden Estimate: The estimated burden has decreased from 5,793 hours to 2,404 hours a year, due to a decrease in the estimated annual number of responses.

Authority: The Paperwork Reduction Act of 1995; 44 U.S.C. chapter 35, as amended.

Dated: May 23, 2024.

Kathleen Claffie,

Chief, Office of Privacy Management, U.S. Coast Guard.

Please feel free to share this information with other interested members of your organization or association.

To facilitate public participation, we are inviting public comment on the issues the committee will consider prior to the formulation of recommendations as listed in the Agenda section below.

There will be a public comment period after each subcommittee update during the meeting on June 26, 2024. Speakers are requested to limit their comments to two minutes or less to facilitate greater participation. Please note that the public comment period for speakers may end before the time indicated on the schedule that is posted on the CBP web page: <http://www.cbp.gov/trade/stakeholder-engagement/coac>.

Agenda

The COAC will hear from the current subcommittees on the topics listed below:

1. The Intelligent Enforcement Subcommittee will provide updates on the work completed and topics discussed in its working groups as well as present proposed recommendations for the COAC's consideration. The Antidumping/Countervailing Duty (AD/CVD) Working Group will provide updates regarding its work and discussions on importer compliance with AD/CVD requirements. The Intellectual Property Rights (IPR) Process Modernization Working Group anticipates providing proposed recommendations for the committee's consideration regarding the Trade Seminars Mailbox and enhancements to the CBP Petitions Portal specific to IPR enforcement. The Forced Labor Working Group (FLWG) will provide updates regarding its updated Statement of Work that aims to enhance focus on technology best practices, stakeholder training and guidance, increased transparency on the Uyghur Forced Labor Prevention Act (UFLPA) applicability reviews, and enforcement of cotton imports under the UFLPA. Additionally, the FLWG will continue to monitor progress of the implementation of prior recommendations made by the COAC.

2. The Next Generation Facilitation Subcommittee will provide updates on all its existing working groups. The Broker Modernization Working Group (BMWG) plans to present proposed recommendations which aim to improve the end user experience and re-envision the Customs Broker Licensing Exam (CBLE). The Modernized Entry Processes Working Group (MEPWG) will report on the work done in the area of Cyber Incident Guidance for Brokers. The remaining working groups, the Automated Commercial Environment (ACE) 2.0 Working Group, the Passenger Air Operations Working Group, and the Customs Interagency Industry Working Group (CIIWG), were not active this past quarter but will provide a report on topics that each working group will focus on in the coming quarter.

3. The Secure Trade Lanes Subcommittee will provide updates on its seven active working groups: the Centers Working Group, the Cross-Border Recognition Working Group, the De Minimis Working Group, the Export Modernization Working Group, the FTZ/Warehouse Working Group, the Pipeline Working Group, and the Trade Partnership and Engagement Working Group. The Centers Working Group has

continued to have robust discussions around the interactions between the Centers of Excellence and Expertise (Centers) and the trade community, including opportunities for improved communications and for providing the trade community with a better understanding of the Centers' internal organization. The Cross-Border Recognition Working Group has continued to discuss best practices at ports of entry on the southern border that facilitate legitimate trade. The De Minimis Working Group has continued discussions on the revised timeframe for submitting Type 86 entries and on potential compliance measurements for de minimis shipments that CBP can communicate to the trade community. The Export Modernization Working Group has continued its work on the Electronic Export Manifest Pilot Program. The Export Modernization Working Group is specifically focused on the effects of progressive filing by the shipper to continuously update export information on successive dates, rather than on a specific date. The Drawback Task Force under the Export Modernization Working Group has continued discussions around recommendations from last quarter, conducting an analysis of program statistics and examining areas to maximize resources. The FTZ/Warehouse Working Group continues to review previous recommendations along with 19 CFR part 146 and anticipates presenting proposed recommendations at the June public meeting. The Pipeline Working Group has continued discussing the most appropriate commodities and potential users of Distributed Ledger Technology to engage once the pilot for tracking pipeline-borne goods deploys. The Trade Partnership and Engagement Working Group has continued its work on the elements of the Customs Trade Partnership Against Terrorism (CTPAT) security program and the validation process.

4. The Rapid Response Subcommittee was inactive this quarter. It will not provide any status updates.

Meeting materials will be available on June 17, 2024, at: <http://www.cbp.gov/trade/stakeholder-engagement/coac/coac-public-meetings>.

Felicia M. Pullam,

Executive Director, Office of Trade Relations.
