

of this information collection submission.

With respect to FCC Form 855, the Commission is proposing to add an information icon to two of the form’s questions for clarification purposes only. The two questions appear in the certification part of the form and the Commission will place a validation stop after each question to ensure that filers provide answers to the questions before proceeding to complete the form. The two information icons will be placed in the following locations and will provide as follows:

- One information icon will be placed at the end of the question requesting filers to provide the percentage of hearing-aid compatible handset models that they provided for the reporting period. The information icon will provide the following clarification: “If your company claims a HAC handset model compliance percentage of less than 85%, then you must indicate above which *de minimis* exception your company is claiming.” The addition of this information icon will not change what the question is asking, but will provide filers with guidance on how to complete the form.

- The second information icon will be placed at the end of the question requesting filers who maintain publicly accessible websites to provide the website address where required hearing aid compatibility information is posted. The information icon will provide the following clarification: “If your company did not have a publicly-accessible website for the reporting period, then type the following statement into the box: ‘For the reporting period, [name of company] did not operate a publicly-accessible website.’” The addition of this information icon will not change what the question is asking, but will provide filers with guidance on how to complete the form.

In addition to these minor, non-substantive changes to FCC Form 855, the Commission is proposing to modify the form’s instructions to provide the following clarifications:

- The filing window for the form opens on the first business day in January each year and closes on January 31, unless January 31 is not a business

day. In this case, the filing window closes on the first business day after January 31. This change conforms the form’s instructions concerning the filing window with the information on the Commission’s wireless hearing aid compatibility website concerning the filing window.

- The instruction which states that service providers should provide the percentage of handset models that they offered for the reporting period that were hearing aid-compatible will be modified by changing the word “should” to “must,” and “must” will be bolded for emphasis. This instruction will also reference the information icon discussed above that will be added to this question for clarification purposes only.

- The instruction which states that service providers must post on their publicly accessible websites certain hearing aid compatibility information required by the Commission’s rules will be modified by bolding the existing word “must” for emphasis. This instruction will also reference the information icon discussed above that will be added to this question for clarification purposes only.

- The instruction which states that service providers who are not in full compliance with the Commission’s hearing aid compatibility rules must provide an attachment explaining their non-compliance will be modified by bolding the existing word “must” for emphasis.

The Commission is not seeking approval of any changes to FCC Form 655 used by handset manufacturers to show compliance with the Commission’s hearing aid compatibility requirements. The Commission is proposing to modify the form’s instructions to provide the following clarifications:

- The filing window for the form opens on the first business day in July each year and closes on July 31, unless July 31 is not a business day. In this case, the filing window closes on the first business day after July 31. This change conforms the form’s instructions concerning the filing window with the information on the Commission’s wireless hearing aid compatibility website concerning the filing window.

- The instruction which states that handset manufacturers must post on their publicly accessible websites certain hearing aid compatibility information required by the Commission’s rules will be modified by bolding the existing word “must” for emphasis.

These minor, non-substantive modifications the Commission is proposing to the existing information collection will provide clarity and promote efficiency. These changes will not affect the burden estimate or compliance cost that OMB has previously approved for this information collection. After the 60-day comment period expires, the Commission will submit the information collection to OMB to obtain a full three-year clearance.
