

approved collection; *Title of Information Collection*: Outcome and Assessment Information Set OASIS-E1; *Use*: This request is to modify the Outcome and Assessment Information Set (OASIS) that home health agencies (HHAs) are required to collect to participate in the Medicare program. The current OASIS version, OASIS-E, OMB control number 0938-1279, was approved by the OMB on November 30, 2022, and implemented on January 1, 2023. We are seeking OMB approval for the proposed revised OASIS data set, referred to hereafter as OASIS-E1, scheduled for implementation in the HH QRP on January 1, 2025. The OASIS-E1 includes changes related to addition of one item supporting an assessment-based quality measure (QM), removal of one item due to retirement of a QM, and removal of two data elements no longer used in the HH QRP or for other purposes in CMS programs. *Form Number*: CMS-10545 (OMB control number: 0938-1279); *Frequency*: Occasionally; *Affected Public*: Private Sector (Business or other for-profit and Not-for-profit institutions); *Number of Respondents*: 11,866; *Total Annual Responses*: 18,017,056; *Total Annual Hours*: 16,683,290. (For policy questions regarding this collection contact Jermama Keys at 410-786-7778).

2. *Type of Information Collection Request*: New collection (Request for a new OMB control number); *Title of Information Collection*: End Stage Renal Disease (ESRD) Annual Home Dialysis within Nursing Home Survey Form; *Use*: The End Stage Renal Disease (ESRD) Network program is responsible to collect, validate, and analyze data as well as to evaluate the process by which facilities determine the appropriateness of patients for a treatment modality. Additional responsibilities of the ESRD Network program include encouraging participation in the placement of patients in a self-care setting, such as home hemodialysis or peritoneal dialysis, as described in sec. 1881. [42 U.S.C. 1395rr] (c)(1)(A)(i)(2) of the Social Security Act. On September 21, 2018, CMS clarified guidance that residents in a nursing home facility can receive dialysis either administered and/or supervised by personnel who meet the criteria for training, and competency verification at 42 CFR 494.100(a) and (b) for providing dialysis. The provision of dialysis within a nursing home requires that the dialysis facility have an agreement with the nursing home. This guidance was reinforced and updated on March 22, 2023, in a memo to the State Survey Agency Directors titled, "Guidance and

Survey Process for Reviewing Home Dialysis Services in a Nursing Home REVISED". Since the provision of dialysis within nursing homes is relatively new, CMS designed the CMS-10842 form to capture home modality information from dialysis facilities that provide dialysis within the nursing home in alignment with the Centers for Disease Control and Prevention (CDC).

The care provided to residents of a nursing home is of particular interest because of the fragile health state of the patient and the susceptibility to infection. Each facility certification/survey record represents one provider. CMS-10842 collects information on dialysis facilities providing home dialysis services within the nursing home related to the number of patients, setting of dialysis services provided, who is providing dialysis services, who is providing dressing changes to dialysis access, staff education and use of CDC Core Interventions used. The aggregate patient information is collected from each Medicare-approved home dialysis provider to identify the specialized needs of the ESRD community where home dialysis is provided in Long Term Care facilities. *Form Number*: CMS-10842 (OMB control number: 0938-NEW); *Frequency*: Yearly; *Affected Public*: Private Sector (Business or other for-profit and Not-for-profit institutions); *Number of Respondents*: 7,726; *Total Annual Responses*: 7,726; *Total Annual Hours*: 5,795.
