*Needs and Uses:* The CMMC Program provides for the assessment of contractor implementation of cybersecurity requirements to enhance confidence in contractor protection of unclassified information within the DoD supply chain. CMMC contractual requirements are implemented under a Title 48 acquisition rule, with associated rulemaking for the CMMC Program requirements (e.g., CMMC Scoring Methodology, certificate issuance, information accessibility) under a Title 32 program rule (32 Code of Federal Regulations (CFR) Part 170). The CMMC Title 32 program rule includes two separate information collection requests (ICR), one for the CMMC Program and this one for CMMC eMASS.

The CMMC instantiation of eMASS is the electronic collection mechanism for collecting CMMC program data, which provides the Department of Defense (DoD) visibility of the CMMC Levels 2 and 3 certification assessment results.

This information collection is necessary to support the implementation of the CMMC assessment process for CMMC Level 2 and Level 3 certification assessments, as

defined in 32 CFR 170.17 and 170.18 respectively.

The CMMC Level 2 certification assessment process is conducted by Certified Assessors, employed by CMMC Third-Party Assessment Organizations (C3PAOs). During the assessment process, Organizations Seeking Certification's hire C3PAOs to conduct the third-party assessment required for certification. The CMMC Certified Assessors upload assessment data: pre-assessment and planning material (date and level of the assessment; C3PAO name and unique identifier; name and business contact information for each Assessor; all industry CAGE codes associated with the information systems addressed by the CMMC Assessment Scope; name, date, and version of the system security plan (SSP); the Title 32 program rule (32 CFR part 170)), final assessment reports (assessment result for each requirement objective; POA&M usage and compliance, as applicable; and list of artifact names, the return values of the hashing algorithm, and the hashing algorithm used), and appropriate CMMC certificates of assessment (certification date, as applicable) into the CMMC instantiation of eMASS.

The CMMC Level 3 certification assessment process is conducted by the Defense Contract Management Agency (DCMA) Defense Industrial Base Cybersecurity Assessment Center (DIBCAC). DCMA DIBCAC assessors upload assessment data: pre-assessment and planning material (date and level of the assessment; name and business contact information for each Assessor; all industry CAGE codes associated with the information systems addressed by the CMMC Assessment Scope; name, date, and version of the system security plan (SSP); the Title 32 program rule (32 CFR part 170)), final assessment reports (assessment result for each requirement objective; POA&M usage and compliance, as applicable; and list of artifact names, the return values of the hashing algorithm, and the hashing algorithm used), and appropriate CMMC certificates of assessment (certification date, as applicable) into the CMMC instantiation of eMASS.

The Accreditation Body provides the CMMC Program Management Office with current data on C3PAOs and Assessors, including authorization and accreditation records and status using the CMMC instantiation of eMASS.

*Affected Public:* Business or other for-profit.
