FOR FURTHER INFORMATION CONTACT:

Rachel Edelstein, Assistant Administrator, Office of Policy and Program Development, FSIS, USDA; Telephone: (202) 205-0495.

SUPPLEMENTARY INFORMATION: The U.S. National Residue Program (NRP) is administered by FSIS to collect data on chemical residues in domestic and imported meat, poultry, and egg products and to keep products that are adulterated because of illegal residues out of commerce. FSIS collects samples of meat, poultry, and egg products at egg products plants, official establishments and official import inspection establishments and analyzes the samples at FSIS laboratories for chemical residues of veterinary drugs, pesticides, and environmental contaminants. Through this testing, FSIS verifies that establishments maintain adequate residue control in

their Hazard Analysis and Critical Control Point (HACCP) systems. As part of the HACCP regulation under 9 CFR part 417, establishments are required to conduct a hazard analysis and to consider the food safety hazards that are reasonably likely to occur, including drug and other chemical residues.

FSIS is announcing that it has revised its *FSIS Guideline for Residue Prevention*, which was last issued on May 29, 2013 (78 FR 32235). The guideline is intended to help establishments meet FSIS requirements regarding violative residue prevention. FSIS updated the guideline in response to frequent askFSIS questions. FSIS also revised the guideline to provide updates based on up-to-date science, incorporate new information on purchase specifications and documentation that can be used to support that violative residues are not reasonably likely to occur and provide guidance for establishments that perform residue testing. Additionally, FSIS updated the guideline to clarify how residues influence New Swine Inspection System sorting procedures and FSIS Kidney Inhibition Swab (KISTM) testing procedures. Furthermore, FSIS made changes to the guideline to improve its readability. The updated guideline is available at: <https://www.fsis.usda.gov/inspection/compliance-guidance>.

This guideline represents FSIS' current thinking on residue prevention and should be considered usable as of the date of its issuance. The information in the guideline is provided to assist meat and poultry establishments in meeting regulatory requirements. The contents of the guideline do not have the force and effect of law and are not meant to bind the public in any way. The guideline is intended only to provide clarity to industry regarding existing requirements under the regulations.
