NATIONAL ARCHIVES AND RECORDS ADMINISTRATION

[NARA–24–0014; NARA–2024–040]

Records Schedules; Availability and Request for Comments

AGENCY: National Archives and Records Administration (NARA).

ACTION: Notice of availability of proposed records schedules; request for comments.

SUMMARY: The National Archives and Records Administration (NARA) publishes notice of certain Federal agency requests for records disposition authority (records schedules). We publish notice in the **Federal Register** and on [regulations.gov](https://www.regulations.gov) for records schedules in which agencies propose to dispose of records they no longer need to conduct agency business. We invite public comments on such records schedules.

DATES: We must receive responses on the schedules listed in this notice by August 12, 2024.

ADDRESSES: To view a records schedule in this notice, or submit a comment on one, use the following address: <https://www.regulations.gov/docket/NARA-24-0014/document>. This is a direct link to the schedules posted in the docket for this notice on [regulations.gov](https://www.regulations.gov). You may submit comments by the following method:

- **Federal eRulemaking Portal:** <https://www.regulations.gov>. On the website, enter either of the numbers

cited at the top of this notice into the search field. This will bring you to the docket for this notice, in which we have posted the records schedules open for comment. Each schedule has a 'comment' button so you can comment on that specific schedule. For more information on *regulations.gov* and on submitting comments, see their FAQs at <https://www.regulations.gov/faq>.

If you are unable to comment via *regulations.gov*, you may email us at request.schedule@nara.gov for instructions on submitting your comment. You must cite the control number of the schedule you wish to comment on. You can find the control number for each schedule in parentheses at the end of each schedule's entry in the list at the end of this notice.

FOR FURTHER INFORMATION CONTACT: Kimberly Richardson, Strategy and Performance Division, by email at regulation_comments@nara.gov or at 301-837-2902. For information about records schedules, contact Records Management Operations by email at request.schedule@nara.gov or by phone at 301-837-1799.

SUPPLEMENTARY INFORMATION:

Public Comment Procedures

We are publishing notice of records schedules in which agencies propose to dispose of records they no longer need to conduct agency business. We invite public comments on these records schedules, as required by 44 U.S.C. 3303a(a), and list the schedules at the end of this notice by agency and subdivision requesting disposition authority.

In addition, this notice lists the organizational unit(s) accumulating the records or states that the schedule has agency-wide applicability. It also provides the control number assigned to each schedule, which you will need if you submit comments on that schedule. We have uploaded the records schedules and accompanying appraisal memoranda to the *regulations.gov* docket for this notice as "other" documents. Each records schedule contains a full description of the records at the file unit level as well as their proposed disposition. The appraisal memorandum for the schedule includes information about the records.

We will post comments, including any personal information and attachments, to the public docket unchanged. Because comments are public, you are responsible for ensuring that you do not include any confidential or other information that you or a third party may not wish to be publicly

posted. If you want to submit a comment with confidential information or cannot otherwise use the *regulations.gov* portal, you may contact request.schedule@nara.gov for instructions on submitting your comment.

We will consider all comments submitted by the posted deadline and consult as needed with the Federal agency seeking the disposition authority. After considering comments, we may or may not make changes to the proposed records schedule. The schedule is then sent for final approval by the Archivist of the United States. After the schedule is approved, we will post on *regulations.gov* a "Consolidated Reply" summarizing the comments, responding to them, and noting any changes we made to the proposed schedule. You may elect at *regulations.gov* to receive updates on the docket, including an alert when we post the Consolidated Reply, whether or not you submit a comment. If you have a question, you can submit it as a comment, and can also submit any concerns or comments you would have to a possible response to the question. We will address these items in consolidated replies along with any other comments submitted on that schedule.

We will post schedules on our website in the Records Control Schedule (RCS) Repository, at <https://www.archives.gov/records-mgmt/rcs>, after the Archivist approves them. The RCS contains all schedules approved since 1973.

Background

Each year, Federal agencies create billions of records. To control this accumulation, agency records managers prepare schedules proposing retention periods for records and submit these schedules for NARA's approval. Once approved by NARA, records schedules provide mandatory instructions on what happens to records when no longer needed for current Government business. The records schedules authorize agencies to preserve records of continuing value in the National Archives or to destroy, after a specified period, records lacking continuing administrative, legal, research, or other value. Some schedules are comprehensive and cover all the records of an agency or one of its major subdivisions. Most schedules, however, cover records of only one office or program or a few series of records. Many of these update previously approved schedules, and some include records proposed as permanent.

Agencies may not destroy Federal records without the approval of the Archivist of the United States. The Archivist grants this approval only after thorough consideration of the records' administrative use by the agency of origin, the rights of the Government and of private people directly affected by the Government's activities, and whether or not the records have historical or other value. Public review and comment on these records schedules is part of the Archivist's consideration process.

NATIONAL SCIENCE FOUNDATION

Proposed Data Collection Submitted for Public Comment and Recommendations

AGENCY: National Science Foundation.

ACTION: Notice.

SUMMARY: The National Science Foundation (NSF) is announcing plans for a new data collection. In accordance with the requirements of the Paperwork Reduction Act of 1995, we are providing an opportunity for public comment on this action. After obtaining and considering public comment, NSF will prepare the submission requesting Office of Management and Budget (OMB) clearance of this collection for no longer than three years.

DATES: Written comments on this notice must be received within August 26, 2024 to be assured consideration. Comments received after that date will be considered to the extent practicable. Please send comments to the address below.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or copies of these information collection instruments and instructions should be directed to Suzanne H. Plimpton, Reports Clearance Officer, National Science Foundation, 2415 Eisenhower Avenue, Suite E6300, Alexandria, Virginia 22314; telephone (703) 292–7556; or send email to splimpto@nsf.gov. Individuals who use a telecommunications device for the deaf (TDD) may call the Federal Information Relay Service (FIRS) at 1–800–877–8339, which is accessible 24 hours a day, 7 days a week, 365 days a year (including Federal holidays).

SUPPLEMENTARY INFORMATION:

Title of Collection: U.S. National Science Foundation (NSF) Regional

Innovation Engines (Engines) Program Baseline and Performance Monitoring.

OMB Number: 3145–XXXX.

Expiration Date of Approval: Not applicable.

Type of Request: New information collection

Description:

The instruments will collect data on (1) individuals in leadership or governance roles in an NSF Engine, and individuals engaged or participating in an NSF Engine activities; and (2) organizations that are partnering with an NSF Engine or participating in an NSF Engine’s activities.

Background:

The CHIPS and Science Act of 2022 codified the National Science Foundation’s cross-cutting Directorate for Technology, Innovation and Partnerships (TIP), NSF’s first new directorate in more than 30 years, and charged it with the critical mission of advancing U.S. competitiveness through investments that accelerate the development of key technologies and address pressing national, geostrategic, societal and economic challenges. NSF’s TIP directorate deepens the agency’s commitment to support use-inspired research and the translation of research results to the market and society. In doing so, TIP strengthens the intense interplay between foundational and use-inspired work, enhancing the full cycle of discovery and innovation.

TIP integrates with NSF’s existing directorates and fosters partnerships — with government, industry, nonprofits, civil society, and communities of practice — to leverage, energize and rapidly bring to society use-inspired research and innovation. TIP spurs science and innovations to meet the nation’s priorities by accelerating the development of breakthrough technologies and advancing solutions.

The NSF Regional Innovation Engines (NSF Engines) program serves as a flagship funding program of the TIP directorate, with the goal of expanding and accelerating scientific and technological innovation within the U.S. by catalyzing regional innovation ecosystems throughout every region of our nation. The NSF Engines program was authorized in the CHIPS and Science Act of 2022 (Section 10388) to:

(1) advance multidisciplinary, collaborative, use-inspired and translational research, technology development, in key technology focus areas;

(2) address regional, national, societal, or geostrategic challenges;

(3) leverage the expertise of multi-disciplinary and multi-sector partners, including partners from private

industry, nonprofit organizations, and civil society organizations; and

(4) support the development of scientific, innovation, entrepreneurial, and STEM educational capacity within the region of the Regional Innovation Engine to grow and sustain regional innovation.

The NSF Engines program aims to fund regional coalitions of partnering organizations to establish NSF Engines that will catalyze technology and science-based regional innovation ecosystems. Each NSF Engine is focused on addressing specific aspects of a major national, geostrategic, societal and/or economic challenge that are of significant interest in the NSF Engine’s defined “region of service.” The NSF Engines program envisions a future in which all sectors of the American population can participate in and benefit from advancements in scientific research and development equitably to advance U.S. global competitiveness and leadership. The program’s mission is to establish sustainable regional innovation ecosystems that address pressing national, geostrategic, societal, and/or economic challenges by advancing use-inspired and translational research and development in key technology focus areas. The programmatic level goals of NSF Engines are to:

- Goal 1: Establish self-sustaining innovation ecosystems;
- Goal 2: Establish nationally-recognized regional ecosystems for key industries;
- Goal 3: Broaden participation in inclusive innovation ecosystems;
- Goal 4: Advance technologies relevant to national competitiveness;
- Goal 5: Catalyze regions with nascent innovation ecosystems;
- Goal 6: Increase economic growth; and
- Goal 7: Increase job creation.

The key drivers of change on how the NSF Engines program intends to achieve these goals are the following:

- Use-inspired R&D;
- Cross-sector partnerships;
- Strategic regional investment;
- Inclusive engagement;
- Workforce development;
- Translation to practice; and
- Governance and management.

Each NSF Engine will carry out an integrated and comprehensive set of activities. In addition, each NSF Engine is expected to embody a culture of innovation and have a demonstrated, intense, and meaningful focus on enabling all individuals throughout its region of service, regardless of background, location, or organizational affiliation, to participate in the region’s
