

This section of the FEDERAL REGISTER contains documents other than rules or proposed rules that are applicable to the public. Notices of hearings and investigations, committee meetings, agency decisions and rulings, delegations of authority, filing of petitions and applications and agency statements of organization and functions are examples of documents appearing in this section.

DEPARTMENT OF AGRICULTURE

Animal and Plant Health Inspection Service

[Docket No. APHIS-2019-0035]

Domestic Quarantine: Quarantined Areas and Regulated Articles

AGENCY: Animal and Plant Health Inspection Service, USDA.

ACTION: Notice.

SUMMARY: We are advising the public of the changes made to our lists of domestic quarantined areas in the past year. These changes may be viewed on the relevant plant pest programs' websites.

FOR FURTHER INFORMATION CONTACT: Dr. Derek A. Woller, Senior Regulatory Policy Specialist, RCC, IRM, PEIP, PPQ, APHIS, 4700 River Road, Riverdale, MD 20737-1228; (480) 490-6454; Derek.A.Woller@usda.gov.

SUPPLEMENTARY INFORMATION: The regulations in 7 CFR part 301 are designed to prevent the interstate spread of plant pests that are new to or not widely distributed within the United States. Subparts C through X (§§ 301.32 through 301.92-12, referred to below as the regulations) each address a specific plant pest and contain criteria for designating certain areas of the United States as quarantined areas¹ for the specific plant pest. The regulations restrict the interstate movement of certain regulated articles from quarantined areas in order to prevent the spread of plant pests to noninfested areas of the United States.

On December 29, 2022, the Animal and Plant Health Inspection Service (APHIS) published in the **Federal Register** a final rule (Docket No. APHIS-2019-0035, 87 FR 80002-80019), effective January 30, 2023, that moved

¹ Certain subparts refer to quarantined areas as "regulated areas," "protected areas," or "suppressive/generally infested areas."

certain lists of quarantined areas and regulated articles from the regulations to web pages maintained by APHIS. In accordance with the final rule, APHIS keeps updated lists of quarantined areas on the relevant plant pest programs' websites, which are listed in the relevant subpart of the regulations. When a change to the status of a plant pest threat occurs, APHIS takes appropriate action to add, expand, remove, or reduce a quarantined area, and the relevant APHIS plant pest program updates the web-based list of quarantined areas for their program. APHIS also publishes a yearly notice informing the public of all updates to quarantined areas that have occurred since publication of the last notice informing the public of such updates.

Since our last action² informing the public of updates to our lists of quarantined areas, the following actions revising our lists of quarantined areas have been taken. Updated lists of quarantined areas are available on the relevant plant pest programs' websites.

Karnal Bunt³

- DA-2023-05

Spongy Moth⁴ (Gypsy Moth)⁵

- DA-2023-04
- DA-2023-11

Imported Fire Ant⁶

- DA-2023-10

Pale Cyst Nematode⁷
