SUPPLEMENTARY INFORMATION:

I. Background

GSA has taken pride in developing innovative, cost-effective, and collaborative solutions to the growing and evolving Federal Electric Vehicle Fleet. OGP, Motor Vehicle Policy Division, also seeks to improve management and enhance the performance of the motor vehicle fleets by fostering interagency collaboration, shared services, and smart policies that allow Federal customer agencies to focus on their mission delivery.

As the EV fleet continues to grow, it has become increasingly important that agencies have a comprehensive, strategic plan for the management of these vehicles to maximize the full potential of their economic, environmental, and strategic benefits.

To this end, in the National Defense Authorization Act for Fiscal Year 2023, Congress requested GSA and OMB to coordinate with the heads of Federal agencies to develop a comprehensive, strategic plan for Federal Electric Vehicle Fleet Battery Management.

II. Purpose

The objective of this government-wide strategic plan is to identify and gain insight into emerging contemporary trends, research, and standards in EV battery optimal use, reuse, recycling, and disposal practices. The strategic plan for Federal Electric Vehicle Fleet Battery Management will incorporate guidelines for:

- (1) Optimal charging practices that will maximize battery longevity and prevent premature degradation;
- (2) Reusing and recycling the batteries of retired vehicles; and
- (3) Disposing electric vehicle batteries that cannot be reused or recycled.

III. Public Comments

Responses may address one or as many topics as desired from the enumerated list of Key EV Battery Management Focus Areas provided in
