

and Resistance in U.S. Broiler Production Study as part of an ongoing series of NAHMS studies on the U.S. livestock, equine, poultry, and aquaculture populations. This study supports the following objectives: (1) Measure and track trends in antimicrobial use (AMU) and antimicrobial resistance (AMR) in broiler complexes within participating companies over time; (2) Evaluate the relationship between AMU patterns and AMR measured in select bacterial species collected; and (3) Quantify antimicrobial resistance genes in the litter of sampled broiler farms and examine the relationship between these quantities and antimicrobial use patterns.

This study is an information collection being conducted by APHIS through a cooperative agreement with the University of Minnesota that monitors U.S. broiler operations for AMU, AMR, animal health and production practices, the relationship between AMU, AMR, animal health, production practices, and changes over time. We will continue collecting quarterly survey data and litter samples from the same poultry complexes and examine AMR in bacteria such as *Salmonella* and *Campylobacter*. This study meets objectives for both the U.S. National Action Plan for Combating Antibiotic-Resistant Bacteria (2015 and 2020) and the USDA AMR National Action Plan (2014). Additionally, this information is an essential component in accomplishing one of APHIS' strategic goals, which is to safeguard American agriculture.

APHIS and the University of Minnesota will continue analyzing and organizing the information into one or more descriptive reports and scientific manuscripts, and for important or special topics, APHIS will continue developing and disseminating targeted information sheets to producers, stakeholders, academicians, veterinarians, and any other interested parties. This information benefits the poultry industry by supplying scientific estimates of AMU and stewardship by poultry producers and evaluation of the influence of these and other management practices on AMR.

We are asking the Office of Management and Budget (OMB) to approve our use of these information collection activities, as described, for an additional 3 years.

The purpose of this notice is to solicit comments from the public (as well as affected agencies) concerning our information collection. These comments will help us:

(1) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(2) Evaluate the accuracy of our estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(3) Enhance the quality, utility, and clarity of the information to be collected; and

(4) Minimize the burden of the collection of information on those who are to respond, through use, as appropriate, of automated, electronic, mechanical, and other collection technologies; e.g., permitting electronic submission of responses.

Estimate of burden: The public burden for this collection of information is estimated to average 1.5 hours per response.

Respondents: Broiler producers.

Estimated annual number of respondents: 30.

Estimated annual number of responses per respondent: 20.

Estimated annual number of responses: 588.

Estimated total annual burden on respondents: 866 hours. (Due to averaging, the total annual burden hours may not equal the product of the annual number of responses multiplied by the reporting burden per response.)

All responses to this notice will be summarized and included in the request for OMB approval. All comments will also become a matter of public record.

Done in Washington, DC, this 25th day of June, 2024.

Donna Lalli,

Acting Administrator, Animal and Plant Health Inspection Service.

Census Bureau

Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Spatial, Address, and Imagery Data Program

AGENCY: Census Bureau, Commerce.

ACTION: Notice of information collection, request for comment.

SUMMARY: The Department of Commerce, in accordance with the Paperwork Reduction Act (PRA) of 1995, invites the general public and other Federal agencies to comment on proposed, and continuing information collections, which helps us assess the impact of our information collection requirements and minimize the public's reporting burden. The purpose of this notice is to allow for 60 days of public comment on the proposed revision of the Spatial, Address, and Imagery Data (SAID) Program, prior to the submission of the information collection request (ICR) to OMB for approval.

DATES: To ensure consideration, comments regarding this proposed information collection must be received on or before September 3, 2024.

ADDRESSES: Interested persons are invited to submit written comments by email to dcmd.pra@census.gov. Please reference Spatial, Address, and Imagery Data Program in the subject line of your comments. You may also submit comments, identified by Docket Number USBC-2024-0017, to the Federal e-Rulemaking Portal: <https://www.regulations.gov>. All comments received are part of the public record. No comments will be posted to <https://www.regulations.gov> for public viewing until after the comment period has closed. Comments will generally be posted without change. All Personally Identifiable Information (for example, name and address) voluntarily submitted by the commenter may be publicly accessible. Do not submit Confidential Business Information or otherwise sensitive or protected information. You may submit attachments to electronic comments in Microsoft Word, Excel, or Adobe PDF file formats.

FOR FURTHER INFORMATION CONTACT: Requests for additional information or specific questions related to collection activities should be directed to Michael S. Snow, Program Manager, Decennial Census Management Division, by phone at 301-763-9912 or by email to dcmd.pra@census.gov.

SUPPLEMENTARY INFORMATION:

I. Abstract

The SAID Program is one of many voluntary geographic partnership programs that collects data to update the U.S. Census Bureau's geographic database, known as the Master Address File/Topologically Integrated Geographic Encoding and Referencing (MAF/TIGER) System. The Census Bureau uses the MAF/TIGER System to link statistical data from censuses and surveys to locations and areas, such as
