*Postage Costs*

Although the USPTO prefers that the items in this information collection be submitted electronically, responses may be submitted by mail through the United States Postal Service (USPS). The USPTO estimates that 1% of the 1,033 items will be submitted in the mail resulting in 10 mailed items. The USPTO estimates that the average postage cost for a mailed submission, using a Priority Mail legal flat rate envelope, will be \$10.15. Therefore, the USPTO estimates the total mailing costs for this information collection at \$102.

**IV. Request for Comments**

The USPTO is soliciting public comments to:

(a) Evaluate whether the collection of information is necessary for the proper performance of the functions of the Agency, including whether the information will have practical utility;

(b) Evaluate the accuracy of the Agency’s estimate of the burden of the collection of information, including the validity of the methodology and assumptions used;

(c) Enhance the quality, utility, and clarity of the information to be collected; and

(d) Minimize the burden of the collection of information on those who are to respond, including through the use of appropriate automated, electronic, mechanical, or other technological collection techniques or other forms of information technology, e.g., permitting electronic submission of responses.

All comments submitted in response to this notice are a matter of public record. The USPTO will include or summarize each comment in the request to OMB to approve this information collection. Before including an address,

phone number, email address, or other personally identifiable information (PII) in a comment, be aware that the entire comment—including PII—may be made publicly available at any time. While you may ask in your comment to withhold PII from public view, the USPTO cannot guarantee that it will be able to do so.

**Agency Information Collection Activities; Submission to the Office of Management and Budget (OMB) for Review and Approval; Comment Request; Fastener Quality Act Insignia Recordal Process**

The United States Patent and Trademark Office (USPTO) will submit the following information collection request to the Office of Management and Budget (OMB) for review and clearance in accordance with the Paperwork Reduction Act of 1995, on or after the date of publication of this notice. The USPTO invites comments on this information collection renewal, which helps the USPTO assess the impact of its information collection requirements and minimize the public’s reporting burden. Public comments were previously requested via the **Federal Register** on April 23, 2024 during a 60-day comment period (89 FR 30324). This notice allows for an additional 30 days for public comment.

*Agency:* United States Patent and Trademark Office, Department of Commerce.

*Title:* Fastener Quality Act Insignia Recordal Process.

*OMB Control Number:* 0651–0028.

*Needs and Uses:* Under Section 5 of the Fastener Quality Act (FQA) of 1999,<sup>1</sup> 15 U.S.C. 5401 *et seq.*, certain industrial fasteners must bear an insignia identifying the manufacturer. It is also mandatory for manufacturers of fasteners covered by the FQA to submit an application to the USPTO for recordal of the insignia on the Fastener Insignia Register.

The procedures for the recordal of fastener insignia under the FQA are set forth in 15 CFR 280.300 *et seq.* The purpose of requiring both the insignia and the recordation is to ensure that certain fasteners can be traced to their manufacturers and to protect against the sale of mismarked, misrepresented, or counterfeit fasteners.

The insignia may be a unique alphanumeric designation that the USPTO will issue upon request or a trademark that is registered at the USPTO or is the subject of an application to obtain a registration. After a manufacturer submits a complete application for recordal, the USPTO issues a Certificate of Recordal. These certificates remain active for five years. Applications to renew the certificates must be filed within six months of the expiration date or, upon payment of an additional surcharge, within six months following the expiration date.

If a recorded alphanumeric designation is assigned by the manufacturer to a new owner, the designation becomes “inactive” and the

new owner must submit an application to reactivate the designation within six months of the date of assignment. If the recordal is based on a trademark application or registration and the registration is assigned to a new owner, the recordal becomes “inactive” and cannot be reassigned. Instead, the new owner of the trademark application or registration must apply for a new recordal. Manufacturers who record insignia must notify the USPTO of any changes of address.

This information collection includes one form, the Application for Recordal of Insignia or Renewal/Reactivation of Recordal Under the Fastener Quality Act (PTO–1611), which provides manufacturers with a convenient way to submit a request for the recordal of a fastener insignia or to renew or reactivate an existing Certificate of Renewal.

The public uses this information collection to comply with the insignia recordal provisions of the FQA. The USPTO uses the information in this collection to record or renew insignias under the FQA and to maintain the Fastener Insignia Register, which is open for public inspection and is updated quarterly. The public may download the Fastener Insignia Register from the USPTO website.<sup>2</sup>

#### SUPPLEMENTARY INFORMATION:

##### I. Abstract

The United States Patent and Trademark Office (USPTO) is required by 35 U.S.C. 131 and 151 to examine applications and, when appropriate, allow applications and issue them as patents. Chapter 30 of title 35 U.S.C. provides that any person at any time may file a request for reexamination by the USPTO of any claim of a patent on the basis of prior art cited under the provisions of 35 U.S.C. 301. Once initiated, the reexamination proceedings under Chapter 30 are substantially *ex parte* and do not permit input from third parties. The regulations outlining *ex parte* reexaminations are found at 37 CFR 1.510–1.570. The purpose of this information collection is to facilitate requests for *ex parte* reexamination and supplemental examination, to facilitate prosecution of reexamination and to ensure that the associated documentation is submitted to the USPTO, and to permit relevant post-patent prior art and claim scope information to be entered into a patent file.

35 U.S.C. 257 permits a patent owner to request supplemental examination of a patent by the USPTO to consider, reconsider, or correct information believed to be relevant to the patent.
